Dear Mr. Toby,

While I have no independent knowledgeof the incident Christian reports on page 23 and he never told me about it that I can recall I also have no reason not to believe it. There have been subsequent reasons to believe I do not have the private line I pay for.

It is my recollection that he placed those calls from a large switchboard, not his own phone. I doubt there was spooking of a radio/TV net.

After his book was cut I wrote Jon about this, asking more details, particularly because I have about 10 current and active FOIA cases. He has not responded. Of course he may be off promoting the book.

I can tell you only that the FRI's response to my earlier inquiries about such activities is evasive, that I am not listed as a target in the FRI HQ Elsur indices. Means nothing. I have been given a similar response on appeal.

When I can I guess I'll have to sue and show where other than FRI HQ memory holes such records are usually kept and hidden.

If you have any information about such matters my lawyer and I would welcome any you may provide.

Sincerely.

"arold Weisberg 12/19/78
