

July 20, 1967

Dear Hal:

Enclosed are the Brooks letter carbon and your response. My only immediate comment is that Brooks must have undergone considerable pain when Stanton, the good doctor, renovated his rear-end to accept IBM (?) programmed cards.

Now, Morgan cannot locate the Kennedy letter; please send me a carbon to make copies off from; I need three more sets of WWI & II and six PWW; am off to Sacramento to broach the entire matter with my aforementioned powerhouse in State politics; should prove interesting, if only to see how credible I really am to him. It's a big apple to ask him to sink his brittles into, especially due to the inherent party considerations. But, I think his prior relationship with JFK will let him rise to our occasion.

Everybody's still in Europe and Asia, with return schedule aimed at August 1st.

Read the Vaganov article in Esquire, came out confused; smell rats but have not enough peripheral dope to ferret his cop-out. Any expert comment?

Good luck with KSL bit.

My best to your delightful spouse.

Best Personal Regards,

Donn

Note: Sorry, Edgar-baby, no code in this one.....
