SASSESSED BENEFIT SASSESSED

Thanks for all the work and good thinking in your 8/3/76 res that unusual "incident report" relating to me and from the CIA.

If you have ways of doing it at the Radiab I thouk it would be a good idea to see if that form is one they med.

I had not given Jenn Christian a thought. He's capable of anything. Burton was them 18-19 years ald and at Wild. Gary also is a possibility I had not considered. And he was involved in an "indident" that cost him an eye.

I had forgotten how free I had been with copies and hew free some of those like Bud have turned out to be with almost smything.

The report includes enough of the content to make me wonder if it is based on everheard conversation only.

While my recollection also is unclear I do believe that there was a mention of draft-dedges and Canada from California.

How would your thinking go if you took the part about printing in small quantities to be an arrow? It is, of course, because there never was any printing,

What do you think about your asking the Radiab and CIA is that report refers to you where names are masked? With CIA I'd ask Game Wilson, POTA/PA Coordinator under the Privacy Act. You could tell him that as I tried to figure up it out I select you.

The Sediac story was not based on any release and I had not release. Joh Serball spoke to me by phone. Others also did. I'm sure he did not use all I sedd.

On the letter substitutes for names, I'm inclined to agree with you. I think it is bikely that A is Bicardo "avis or one of his group. The unnamed agent is Bossnko. The original form of the kickback nonsense is a Pearson-Anderson column during the Carrison period. They did not disclose their source. In private they have said it was a Washington lawyer. Does that fit Edward P. Morgan, who I understand now depresents some of the FET's official grooks? You know the Maxico City end. As I recall the guy they are most likely talking about is "garte Alvaredo.

I did not reell the NYT 8/28/64 story about Guinn going over the paraffin tests for the WC. I'd appreciate three copies of this is you can go to that trouble, one for Jim, one for me and one for a reporter I tried to interest in this sens time ago. He retains the interest but was able to de nothing. I think Guinn then was with Guif. Atomic in San Diego. In this connection you say recall the Asbervold letter in PM. This might also be helpful in the spectro case.

We stay overly busy on the litigation and preparations for more. I think it is promising on all fronts and all counts.

Thanks for the time, trouble and help

Sincerely.
