

9/6/77

Dear Dr. Cohen,

Thanks for your note and the check for the rest of the copying.

As you've probably heard - but in case you have not - the Senate hearing scheduled for the 9th has been delayed until the 20th. The reason is the CIA's belated discovery of an additional 10,000 pages of mind-bending records. The subcommittee says it needs this time to go over them prior to a hearing, ~~now~~ now set for the 20th.

I understand it also claims that what it has examined leads it to believe those the staff has questioned were not fully truthful, informative or both.

The Washington Post did not report this. I understand the NYTimes did. The Post did have a story on the White/Hull files found in the college near San Francisco.

I still have not heard from the CIA on the records partly reported, I think a new total of 8,000 pages. I've not pushed too hard because that much money presents a problem to me and because I stay too busy without those records. If you want to obtain them by another way let me know. If not when I get them I'll provide copies, as I will also with the newest 10,000 or whatever part they disclose. I did ask my lawyer to phone them and ask about this newest stonewalling but he was taken ill. In time he will and I think that with an inquiry they'll provide copies.

My belief is that when the LA part of this whole story comes out the fans will be overloaded.

Best wishes,

With thanks for your
efforts.

Sid Cohen
