James Earl Ray Not King's Murderer

DALLAS (Albatross News Service)—The Committee to Finger the Patsy named James Earl Ray their Patsy No. 2 in the ongoing coverup of truth behind the political assassination conspiracies of the '60s.

The Committee to Finger the Patsy (CFP) is a national group formed to clear the names of innocent patsies framed during those well-known assassination conspiracies. James Earl Ray is the patsy whom actual conspirators framed for the murder of Martin Luther King, Jr.

A CFP spokesman noted, "Mr. Ray is not a murderer. There is overwhelming hard evidence to prove his innocence. There is no proof of his guilt at all. This is why coverup authorities refuse to allow him a trial."

Last Spring, CFP named Lee Harvey Oswald, the JFK conspiracy patsy, its Patsy No. 1. Their spokesman commented, "Millions of Americans know that Ray, like Oswald, was framed. We want to know why and by whom. CFP wants to clear the names of these innocent men duped by conspiracy.

"When we first met in the Spring of

'77, our goal was to bring the truth to the American public about these patsies. Our government has lied to us about the assassinations. We want the truth."

In other business, the Committee announced public response to its initial effort to clear Oswald has been "most rewarding." Their spokesman explained, "We forced the conspirators to release that book of lies and fiction about Oswald and have his wife try to counter the truth we were describing."

He added, "Naturally, the major news media ignored us and continued to splash publicity on the coverup because that's their part of the game plan. We're not in their New York and Washington private power club and don't want to be. But, lots of small newspapers and stations across the country ran our story."

This year, CFP plans to release more information on other conspiracy patsies and to work toward the eventual truth about the assassinations, exposing the true conspirators and their friends in government, military, intelligence, organized crime, and media.

COMMITTEE to FINGER the PATSY fingers

Patsy Number Two: JAMES EARL RAY

The continuation of the Lone-Assassin Myth with the alleged murderer of Dr Martin Luther King jr makes almost as much non sense as the fabrication about Lee Harvey Oswald, the JFK conspiracy patsy.

In each case the simple, completely unnatural act of leaving a trail of "hot" evidence at the scene of the crime makes it obvious that these piece should be considered only as planted red-herrings.

Eye-witness descriptions of the "assassin" fleeing the rooming house bear no resemblance to Ray. As in the case of Patsy Number One, Patsy Number Two did not fire a shot that day (April 1968)

CFP, in its effort to assist Ray, is asking anyone who refers to Patsy Number Two in any way, at any time, anywhere to please use the following tag-line:

.....James Earl Ray, the MLK conspiracy patsy,

(emphasis added for this release only)

CFP thinks this will soon put the media in tune with public opinion, 69% of which does not believe this Lone-Assassin Myth.

CFP expects to name Patsy Number Three ...soon
