Oswald's leaflet

Harold Weisberg

Paul Hock sent me a copy of FBI Exhibit D-25 that has a note at the bottom reading 97 - 74. lA5 Rec 8/20/63 from Jesse Core".

Jesse has give me a Xeroxed copy made from his original, which he had earlier crumpled in anger and tossed at aswald.

The FET copy has sentathing I can not decipher written in the upper right corner. his is not on Scre's original, which have examined. On his criginal, he has lined around the stamped address. his is not on D-25. Of course, I do not know when Jess did this, and it is possible he did after the FBI copy was made. However, his copy does have this legend in the upper left: "Demonstration before ITM". That is not on the FBI copy, and it could have been added after that copy was made.

A BANGAN BANGAN

I will asks him if he recells when he added his marks.
