Dear Sir:

This is regarding your letter (copy attached) and subsequent conversation on the telephone. Attached is a copy of a letter sent to John Judge of the Coalition on Political Assassinations dated February 11, 1995. As a result of this letter the notice was published in the April issue of Open Secrets (copy attached).

After reading the book The Lone Star by James Reston Jr. I sent him the attached letter requesting information regarding the stetson. Since I had not received a reply I talked to him on the telephone on September 14th. He stated that he had not received my letter and confirmed that the address was correct. He stated that to his knowledge there were no holes in the stetson but was convinced that if there were holes in it the stetson would have been turned over to the authorities for examination. He does not know if the stetson is still in existence.

I hope that American researchers can get conclusive information on the stetson because it is very important.

Sincerely,

*Kenneth D. Curry*  
Kenneth D. Curry

Dear Sir:

I have just finished reading your book "The Lone Star" and found it very interesting. I am a retired member of the Royal Canadian Mounted Police and have been interested in the assassination of President Kennedy and the wounding of Governor John Connally for many years.

After the wounding of Governor Connally his clothes were dry cleaned and eventually turned over to the authorities investigating the case. The stetson hat he was holding on that day was never turned over or examined by the authorities. Do you know if there was a bullet hole in the stetson or holes made by fragments of a bullet? Could you also tell me if the stetson is still in existence.

Answers to these questions would be greatly appreciated.

Sincerely,

*Kenneth D. Curry*
