Dear Mr. Curry,

7/9/94

Although you said to keep any overpayment, the prices I gave you included domestic postage so you paid for postage twice. My wife will calculate and enclose a check. We'll not know the correct charge until we get the receipt the day after placing the package in our rural box.

Please excuse my typing. It cannot be any better. Much as I'd like it to be!

Suggesting someone here who would be interested in factual information about the JFK assassination is not easy. Most of those interested in it regard themselves as Sherlock Holmes returned and most are Keystone Kops, junior grade, and apprentices at that.

The major media usually ignores all criticism of the official mythology. There has not, for example, been a review or even a mention of Case Open. Yet almost all went ape for Posner's successful dishonesty. I know of not a single instance of any real checking and only one of superficial checking.

It may not be impossible but I think there will not easily be any major media interest. There is one reporter who may be an exception. He is on sabbatical that should soon be over.

If the time comes when you feel you can tell me what it is I may perhaps get an idea from the information.

But I do think that you also should do, rather have some checking for which you probably are not prepared. What may seem to be reasonable may in fact be impossible. You cannot really judge from most of the books.

If NEVER AGAIN! were available I think you could see this easier. I have no idea when it will be published. The reason given for delaying it still again, now until not before next March, is false. But at 61 and in impaired health there is little I can do about that.

It begins by documenting that there was an immediate official determination not to investigate the crime itself. And it wasn't. So there are no leads in any known official information to follow. That decision was made as soon as Oswald was killed.

Case Open, by the way, was butchered. It is about 3/4 of what I wrote, too.

If I can be of any help, I'll try to be.

Particularly because of your background I suggest that you first read the transcript of the 1/22/64 executive session in Post Mortem, pp 475 ff, only 14 pages, and then read the books as they appeared. I think that transcript will give you an understanding of the Commission that will help understanding.

I will regard your letter as confidential and have so marked it.

Thanks and best wishes,

Harold Weisberg

I am a retired member of the Royal Canadian Mounted Police. Five years of my service while in the force was working in the Security and Intelligence Branch (Counter-espionage) at our headquarters in Ottawa, Ontario. We worked in co-operation with the C.I.A., F.B.I., and all other intelligence agencies in the western world. The security and intelligence branch was later reorganized and transferred to a civilian organization named Canadian Security Intelligence Service. During this time I gave the government some advice on how it should be structured. I did security duty for President Eisenhower when he visited Ottawa and the Royal family when they visited Canada. I am very familiar how intelligence agencies function and the security procedures for government officials.

The rest of my service was doing criminal investigations. I was a member of the R.C.M. Police competition rifle and revolver teams and instructed air and army cadets in shooting. I have been a big game and bird hunter most of my life.

After my retirement from the police force I got employment in private industry and went to night school for four years completing a course in civil law and thirteen other courses related to the operation of a business. After completion of the courses I started a printing company which I still own and operate.

When the circumstances of the assassination started to come in via the news media and the claim was made that Oswald was the lone assassin it did not sound right to me. I ordered the condensed copy of The Warren Report when it first came out. When I came to the part where they stated that the same bullet that entered the president's back also caused the wounds to Governor Connally I knew that the report was a fraud.

A few years ago when I was helping an author of a book with research on a different matter we obtained information on the Kennedy assassination. I have been checking the validity of this claim and so far it appears to be credible but much more work is required. After reading your book "Case Open" it is quite obvious that you have done the most accurate research and your books should help me determine if the information obtained is legitimate.

If it turns out that the information is valid can you suggest someone in the United States I should give the information to so that it is acted upon properly. I am not doing this for money or personal recognition my only interest is to see justice done.

I request that you keep my name confidential.

Sincerely,

*Kenneth D. Curry*
