

CUTLER DESIGNS 12/16/68 Dear Bob, Returned from N.O. last night. Thanks for pix. I asked Jaffe to take those pictures and he never sent me copies. We are okay, only I'm very tired. The pace tells. I'll be going back to N.O. before the Shaw trial. I wish I could answer you on publishing. I've had my hottest book of all ready

enclosed please find two photos having to do with the 'escape hatch' to the underground system of sewers -- you wrote me a long time back and asked if I had taken a picture of this -- I had not but these are copies of some taken by Steve Jaffe whom I assume you know -- anyway they came to me by way of a man in Dallas, A P Kimbrough, who was recommended to me by Garrison and Penn Jones -- he stopped by my house last August, he was staying at his old family house in the western part of this state, and loaned these to me for copying -- I became so involved in an article which Atlantic Monthly turned down and Houghton Mifflin is now reading that I neglected to get the copies to you -- I know by the Midlothian Mirror that you were recently in West Texas -- other than that how are you? and do you have any suggestions re publishing a 10,000 word bit entitled the flight of GE-399 with illustrations by the writer -- this only deals with space and time between Z-185 and Z-235 -- it was Penn's recommendation to be 'expert' in one detail

for the offset camera since a year ago September, did COUP D'ETAT this DATE June, have two others in rough draft, but nothing published of all of it. I will, of course, continue writing and have several others under way. But the climate is not propitious. When I was in Dallas I interviewed, had little time in four days, so saw no others working in field except Penn. Specialization is good. I tried to get Ray Marcus to do more with his "Bestard" for that reason. I'd like to see a copy of your piece some time, perhaps be able to quote it in the autopsy book. I've gotta get to the accumulated stack of mail and other work. Many thanks keep up the good work, have a good year, and my best to the others I know up there who you may see or speak to. In what is new, I'm satisfied the book and movie, "Farewell America" are fakes. Garrison has the flue, and I think this time there will be a Shaw trial.

Best,
