

# ONE-BULLET BALLOT

**WHEREAS** in November, 1963, President Johnson having appointed a Commission (Executive Order 11130) "to ascertain, evaluate and report upon the facts relating to the assassination of the late President John F. Kennedy and the subsequent violent death of the man charged with the assassination";

**WHEREAS** in September, 1964, said Commission having submitted its Report;

**THERE IS** in February 1967 a cacophony, "a muffled roar, like the beating of the stormwaves on a stern and distant shore" voicing doubt and disbelief in this Report;

**WHEREFORE** this advertisement is designed and published to instigate action; therewith shall the Congress know the appropriate action to effect.

The following excerpts from the Report, Bantam Book Edition published October 1964, constitute the very heart of the Commission's thesis:

page 98 in part:

"All the evidence indicated that the bullet found on the Governor's stretcher could have caused all his wounds. The weight of the whole bullet prior to firing was approximately 160-161 grains and that of the recovered bullet was 158.6 grains."

page 105 in part:

"Referring to the President's neck wound and all the Governor's wounds, Dr. Dziemian testified: I think the probability is very good that it is, that all the wounds were caused by one bullet. Both Drs. Dziemian and Olivier believed that the wound on the Governor's wrist would have been more extensive had the bullet which inflicted that injury merely passed through the Governor's chest, exiting at a velocity of approximately 1,500 feet per second. Thus the Governor's wrist wound suggested that the bullet passed through the President's neck, began to yaw in the air between the President and the Governor, and lost more velocity than 400 feet per second in passing through the Governor's chest."

page 107 in part:

"From the initial finding that (a) one shot passed through the President's neck and then most probably passed through the Governor's body, (b) a subsequent shot penetrated the President's head, (c) no other shot struck any part of the automobile, and (d) three shots were fired, it follows that one shot probably missed the car and its occupants."

The diagram below is NOT, repeat NOT, an excerpt from the Report; its inclusion is designed to assist in understanding, marking and mailing ballots to Senators and Representatives in the Congress.

HONORABLE \_\_\_\_\_ WASHINGTON, D. C.

I urge you to take any and all actions you deem appropriate to re-open the investigation.

I urge you to take any and all actions you deem appropriate to stop further investigation.
