Dear Ms. Davis,

Your books are in the mail, thanks.

There are organizations of proclaimed interest in the political assassinations.

There is not one of which I know I can recommend to you. Most are irresponsible, inaccurate and impose on the trust of concerned people.

There are two other books I cannot praise too highly. One is Howard Roffman's Presumed Guilty, publisher A.S.Barnes. The other is Sylvia Meagher's Accessories After the Fact, reprint now available from Vintage.

The average person has no way of knowing it but the other works, for the most part not really serious works, are seriously flawed.

You ask for other sources of information. The material now available from the government is of great cost and volume. I do believe that until you have read all the serious, dependable works seeking xeroxes of the records would be neither wise nor inexpensive.

Sincerely,

Harold Weisberg

Dear Mr. Weisberg:

I am enclosing my check for two of your books on the JFK assassination and look forward to receiving them.

If you could possibly suggest any further sources of information or any kind of organization to which I might write regarding any new evidence, it would deeply be appreciated. I am doing, and have been involved in research, and as of yet have not read any books written by you, so I am anxiously awaiting my order.

Thank you.

Sincerely
Mary Davis
