Dear Allan,

Many thanks for a good show. You have an excellent audience. I think it not spontaneous.

Increasingly I find known threats to kill the President suppressed by the Warren Commission but in its files. Viz the last chapter of Oswald in New Orleans. Also, another by the National States Rights Party, Calif rather than Ga.

So several things in your note are of more than usual interest (tape arrived fine but I've not had a chance to play it). First, the fact that the government knew of this and suppressed it. I can understand your reason for hiding the identity of Mr. X, but if you think you could trust me with it, to mention it to no one, I'd like to just ask the Archives for all FBI interviews with him. It is just possible it is a) there and b) not suppressed.

It is not likely the pair of visitors were Secret Service. It is more likely they were FBI. I take what you report not to be solicitude on his behalf but a warning to silence.

The visit from the Garrison investigators was probably because of my attempt to interest them in this. Remember, last year, when you told me of this, I asked you to send him a tape rather than me. That was an error. I should have dubbed it and sent it to him, with a summary.

We have a little more that tends to fit with what you told me but it is anything but conclusive. Interesting, though.

Again, many thanks.

Good luck,

Sincerely,

Harold Wisberg
