Model # of Mobil Unit

Model #

Found an old Mobile Radio
of that vintage -

7C

10:05A 9/17 Talked to [REDACTED]

Explained to him as to what
I needed re equipment questions
said he would check to see
if he could find the data
& call me back -

9/19/85

Ch. 2 - parade traffic - Simple

the result to talking to 5 different people

Some of the things they recall for

McDan - dispatcher

Motorola
radio Model T31 Bat - 1130A

Sample Radio Motorola

Transistorized Dispatcher Radio

Ser # G-26786

Transmitter type CC1500

Model T31 BAT-1130A

Motorola Inc, Chicago, Ill.

The same radio was in the
two-wheeler & the three wheeler

had to have some failure in the mike

7c

②

9/19

quality of phone lines were better in 1963

standard mobile mike

not noise cancelling mike -
now noise cancelling circuitry

mike would have been a Motorola

chart in for ch. 2

W.E. - western Electric

bell -
quite
over a
man
wide cover

WAR type equipment -
broadcast quality audio

2700
voice grade phone line

frequency limitation was the
recording device itself - recording
system was also a joke -
45 megahertz band were very noisy
