

Dear Paul,

9/5/84

Thanks for the picture of the pretty little girl, already smiling. By why did you trim the copy to make it look like it came from the CIA?

Thanks also for the info. If I did not explain, my interest in where Tippit was and when he was there has to do with something Gary Mack has promised to send but I've not yet received, a clear exchange between him and the dispatcher that is not included in any transcription. I'll delay further checking here until I get what he sends.

I do not recall the year Golz wrote his story but it was within the last year or two he was on the paper.

There is another thing I'm going to have to search for Theoharis and it may take much time. If I sent you anything on it that has a file and serial number, that could help much. It has to do with the editing of Hoover's WC testimony. I had a full file on it I cannot now locate. Not even the folder. I mean a file of duplicates. The originals are in place as I received them.

If there is a remand in the field offices case, the omitted Tippit exchange can assume some significance in forcing a real search for the FBI's copies of the tapes. I find it not easy to accept their persistent lying and running risks rather than searching not easy to attribute the stonewalling only.

Best to you all,
