Dear Mary,

At Eud's I told you about Shaw's and other perjuries eside from those Carrison has charged. Then heard nothing further about it from you, presumed it represented no special interest to you. Cary now tells me otherwise and asks that I send you the enclosed, CD6:416-7 and CD 205:216-217. He has already given you wrints of the appropriate stills from the movie.

I got that movie ofter "signing away my life", as the men who gave it to me put it. There is to be no public use of it of any kind.

If this fits with enything you have, I would, of course, welcome it, for it would help inwwork and may, in turn, fit with what + know that is not in any commission file.

I traced Messley to Dellas, where she comes from, but didn't have time in the brief period I was there to try and locate her. She divorced Ike Neeley and returned to her family. They own a business something like Fritos. I asked Tend to try and locate her, at least consult the city directory. He has, as with every similar request I devermede of him over the years, been silent, never having done one of these things, also he wing promised to. If you could find her and give me ner address, or talk to her and persuade her to get in touch with me, it mign to very helpful. This is only one of the areas in which the possibility exists. There are others, and in some of them some of your colleagues may be uncomfortable, may be presented with conflicts. I therefore ask that you share this with arch alone. There are other elements of ITM interest, most unknown and some with the potential of real significance. Unfortunately, the New Orleans investigation was concerned with investigating only out of New Orleans, so even where they had the leads, they did nothing. I use the plurel, but ultimate unrevelling might boil it all down to one. I believe this remains one of the more worthwhile areas of interest and inquity.

In my own work, having completed the addition to COUP D'ETAT, while my wife is reading and correcting the retyped copy I am tryingxto clean up what accumulated, spend a little time on my continuing autopsy work, battle with the government to get what they cannot deny me but do, and prepare for suing them. Bud is my lewyer. I trust him, although there are friend he has I do not trust end beliefs I do not share. He has steadily gotten much busier in his practise and for a newly-established firm, especially where the pertners have not been in civil practise, I imagine he is doing better than could be expected. for the recent past, all of them have been getting in the office as early as 7 a.m. I can remember when he was not there by 9:30. He is presently abroad on one of his ceses. This has slowed down what he can do for me. I em aware, by the wey, and have for some time been, of the friction between him and Sue and the estensible cause. I have seen other of his florida notes, and there are all sorts of strange things not related to them, where he put something down not to forget it. I em also aware of her dedication to Penabaz. Given her deep colitical beliefs and her not knowing of him what I do, I can understand why she hald and holds them. I do not believe he is quite what she thinks he is. If she is not sware of the invidious role he played in what interest us -which is not the whole story - she can more easily respect him. But to return to my own work, I am surprised that I can still make new discoveries about the autopsy-medical espects because the archives has now decided to withhold from me everything on it other than the panel report and the family contract. This is the writing to which I return soon.
