

- [8] Was a firecracker or other detonator or squib set off at the time the first bullet was fired, to give the simulated sound of a rifle shot, assuming that the first bullet was not actually fired from a rifle? [2H73, 2H78, 7H517, 7H518, 6H195, 6H184, 24H524-525, 7H106-109]
- [9] Was the "firecracker" noise of the first shot related to the "odd" reported behaviour of the first bullet? [See any critique of the Report.]
- [10] Could the two non-fatal bullet wounds, in the President's throat and back, have been made by special non-permanent bullets which disintegrated after entering President Kennedy's body? Could one of these have been fired into his throat, and the other into his back, at the time of the first "firecracker" noise? [Not covered in the official investigation.]
- [11] Were "ice bullets" only a fantasy of Chester Gould, or is it really possible to construct a low-density, low-momentum, non-lethal bullet out of ice? [Chester Gould is closely informed of criminological progress.]
- [12] If the type of military funeral accorded to President Kennedy was not the type of funeral normally accorded to ex-Presidents who have died after their terms of office, particularly if the ex-President had no military career and was a Quaker, then why was the military honor guard rehearsing for weeks before President Kennedy's assassination, under orders to be ready in case ex-President Hoover should die at any moment?

Capt. Richard C. Cloy (one is tempted to say "the late..." on general principles), who was in charge of part of the military funeral of Pres. Kennedy, said "We were preparing the actual funeral arrangements less than an hour after the President was shot. We were in a state of readiness and had just finished a funeral rehearsal, because there was grave concern for President Hoover's health." (20H750). [President Hoover died a year later, on Oct. 20, 1964.]

- [13] What reasonable circumstances can be postulated which might cause reputable and responsible citizens of high probity and patriotism to deliberately cover up evidence pointing to a conspiracy, and to issue a grossly inadequate, erroneous, and misleading report such as the Warren Commission report is? [In this connection, note 14H484, 5H240, 5H241, 5H260, as leads to an answer which makes sense.]
- [14] What evidence indicates that Oswald was held back and not brought down to the basement until just after Jack Ruby could be known to have entered the basement? [7H357, 15H125, 15H128, 15H132, 24H138, 24H143, 23H913, 23H840, 17H395.]
- [15] Do the exact circumstances related by Jack Ruby, as to when the idea came clearly into his head to kill Lee Oswald, suggest that Ruby might have been following a plan suggested to him at some prior time, without his direct knowledge, and involving a "triggering" mechanism which was his swallowing of his "Preludin" dieting pill on Sunday morning? [5H198-202]
