Paul and Gary re Davison 1/11/69 hw

A former Atlanta reporter was here sturday. I asked him by phone today if he could get what the morgues of the Atlanta repers have and his answer was not unequivocal. He said he left those perers because they were so crummy, and his relations are not good. The same is true for a friend of his covering that territory for his present paper. However, if he'll go through the motions and ask the area man, it is always possible that one still has a friend at either or both papers who would do this. The advantage is not just the great saving in time. There may well be other stroiesm such as after his return from Moscow, having been in the news, or a feature on how it feels to be called a spy, or something on his education and training. I think before we try and find time to spend in the library on what might be a very time-consuming search that then could not be complete, it is better to try this way.

He811 be up again soon, I expect about weekend after next, and I'al hand him the memo and see what happens.

When I saw the McCluney in the obits, I couldn't nelp but wonder, wishfully, that it was a typo for MM McLaney.

11/11/69

Deer Paul.

This memo, after our phone conversation today, is intended to remind me as much as inform you. I'll give it to you when you are here.

What I would like to get from the morgues of the atlanta papers is everything they have on Dr. leksei Davison, of whom I spoke to you Daturday. Here it possible for me to spend the time at the dibrary of Congress and check the key dates as ik know them, I might still miss a significant feature of story not keyed to the major evenets of interest to me.

If Calvan has a relationship with either or both librarians that would enable him to ask for xaroxes of what they have, it could be valuable. In turn, I promise you that when we have this all wrapped up and in context, it will be given to you. It is a small part of a larger story a small part of which I told you.

Father (Hel McCluney Davison, famous doctor, died 4/27/68) last address 2888 Fabersham Rd. Second son Feter, Captain, USAF. Aleksei not in Itlants practise on last report. Mother white Russian refugee world War 1. Both parents in Siberien expedie tionary force, later Red Jross.

I reslize from what you said this might be impossible, but if you'd ask Galvan when you can, on the chance he has a personal friend at either place, I would appreciate it.

Meny thanks,
