1/19/90

Ed Demar P.O.Box 3518 West Sedona, AZ 80340 Dear Ed.

It is a long way from Chicago to Arizona. But then it's been a long time! hope the years were good to you.

As your apparent faith in Wilkiam Cooper most assuredly isn't.

In your letter you say he says "Greer fired the fatal bullet at Frames 312-313-314." In the bablio, under "Other," then Cooper and the videotape, you say, "i)ncludes videoclips showing Greer administering the coup d'grace to President Kennedy..." (sic).

There are very few things about which we can speak with absolute finality in the JF. matter but one of the very few is that as with so much of what I remember of his ravings, this is absolutely impossible. As the Zapruder film alone makes certain. Moreover, there are no original "videoclips." So whatever he made up is made up and false. Absolutely. By which I mean no question at all.

You ask if I know where 'reer is. If Cooper did anything at all other that imagine things and then spread then around as fact he'd have known that Greer died many, many years ago, from the ulcer that led to his retirement.

Please believe me, what Cooper says is absoluetly fale and physically impossible.

Why in the world didn't you check with me first, before getting yourself associated with such irresponsibility?

Now I don't know what is meent by those "videoclips" unless he also contrived some kind of drawing but those frames are published in the second exhibit volume of the Warren Commission records that perhaps some library near you has. You can see that he was not shooting JFK.

I have no interest in the rest of it but I'd like to see what he represents as proof that all te thousands who examined the Zapruder film and all the millions who saw it over and over again on TV did not see!

I'll not be able to go into this any more because in addition to the other infirmities I carried into the last part of my 76th year I've just recently had a triple bypass and an limited.

Best wishes.
