

Beyond the ...

PHILADELPHIA EXPERIMENT

Lecture by Dr. Al Bielek

(one of only four survivors of the disastrous "invisibility screen" project involving the USS Eldridge (DE 173) in 1943, and which the U.S. Navy still denies. He will review the entire project, dating to participation of Nicola Tesla, Albert Einstein and John von Neumann.)

Bielek, whose Ph.D. is in physics, has come across a privately-published book, no author shown on the title page, but who is thought to be the late David H. Lewis, titled *Mysteries of the Pyramids*, being circulated in underground circles, about the discovery in 1976-77 of a huge room 500 feet beneath the Great Pyramid at Giza filled with pre-humanity artifacts and technologies. Some 2,700 photos were taken and a number of them are included in the manuscript. He will have a limited number of xerox copies available at \$10 and will take orders for mail delivery at \$12.50.

Time: 1:30 p.m.

Date: Saturday, March 10

Place: Elks Lodge, off Airport Road, Sedona, Arizona

Cost: \$8 per person

Seating: Limited to audience of 125

Another presentation of the Nameless Ones of Sedona
