DEAR MR. WEISBERG

ALL OF MY RESEARCH, AND CONCLUSIONS ARE BASED ON ALREADY WELL KNOWN AND ESTABLISHED FACTS CONCERNING PRESIDENT KENNEDY'S ASSASSINATION. INCLUDING INFORMATION PROVIDED BY YOUR WHITE WASH SERIES OF BOOKS OVER THESE MANY YEARS. AND AS I HAVE EXPLAINED TO MANY OF THE OTHER TOP AUTHORS, AND CRITICS OF THE ASSASSINATION. IF AFTER READING MY BOOK, YOU SHOULD FIND ANY DISCREPANCIES, CHALLENGING ANY OF MY CONCLUSIONS, BY ALL MEANS, LET ME KNOW, SO THAT I CAN GO BACK OVER EVERYTHING AGAIN. AND I WOULD LIKE TO THANK YOU FOR TAKING THE TIME TO READ MY BOOK.

T. DiPalo

BACKFIRE IN DALLAS

The 36 year long mystery surrounding the assassination of President John F. Kennedy in Dallas, on November 22 1963, comes to an end.

READ

BACKFIRE IN DALLAS

And learn the fascinating details of Lee Harvey Oswald's key role in a C.I.A. - Mafia plot that backfired. Resulting in the untimely death of President John F. Kennedy, on November 22 1963.

Also learn details of the Robert Kennedy - Secret Service coverup And their desperate (although futile) attempt. To try and hide these two facts from the American Public. And also to keep evidence of all of this, out of the hands of J. Edgar Hoover. A well known enemy of the Kennedy administration. To use for future Blackmail purposes.

Read how the Warren Commission had been created, within several days of the Presidents death. For the specific purpose of taking over and stopping Mr. Hoovers continuing investigation.

Also uncover the mysteries of A.J. Hidell, the Magic Bullet and backyard photographs, Rubys shooting of Oswald. And the well planned ambush, from the famous Grassy Knoll.

Also discover disturbing links between the Garrison, Watergate and House Select Committees Investigations. And President Kennedys assassination in November, 1963. And much, much more!

BACK FIRE IN DALLAS

For nearly thirty five years now the mystery behind the assassination of President John F. Kennedy has been hidden from the American public. I have spent nearly thirty years now searching thru tens of thousands of pieces of information. These included Warren Commission documents and testimony, C.I.A., Dallas Police Department, and F.B.I. reports. Searching for some clue as to why the Warren Commission would want to cover up the true facts behind the Presidents shooting in Dallas.

I have always known that in order to convict someone of a crime, you first have to have a motive for the crime. But it appears from the Warren Commissions report that Lee Harvey Oswald had no motive. I also knew that in order to cover up the murder of the President of the United States, which was also a criminal act, that there had to be a motive. But who would have such a motive?

It appears from the commissions report that both Lee Harvey Oswald and his killer Jack Ruby had previous connections to government intelligence agencies. I had already eliminated many of the usual suspects, such as General Walker, the Russians, Cuba, Texas oilmen, etc. Mr. Castro himself only weeks before the shooting actually seemed to be warning President Kennedy against trying something which could endanger the President's life.

It also appeared that the assassination was an inside job by someone who knew about the motorcade plans by October 16th. That was the day Lee Harvey Oswald had gotten his job at the T.S.B.D. building. I also knew that on Monday November 18th, a few days before the assassination, Chief Curry of the Dallas Police Department and Captain Fritz were notified about a change in the motorcade route, taking it past the T.S.B.D.

After over twenty five years of research I had narrowed my list of suspects down to two. The Dallas Police Department, and Secret Service officials. Both agencies not only had the means, but also a great motive to cover up the Presidents assassination. Both of these agencies were responsible for the Presidents security in Dallas, and both had failed. Which led directly to the Presidents death, heads would have rolled.

I had also discovered another disturbing fact between these two agencies, and all the evidence found after the assassination. Reading thru the F.B.I. reports carefully concerning this evidence, I noticed that they appear to show that none of these pieces of evidence had what lawyers would call, a chain of evidence, showing exactly where it was found, or who found it. This meant that none of it could have been used against Lee Harvey Oswald. Oswald would soon have been set free.

In fact, the F.B.I. reports unmistakably imply, not only that this evidence was planted, but also that it appeared to be planted by the Dallas Police Department and Secret Service officials. Or that someone else was supplying these two agencies with this false evidence.

In 1980 Mr. David S. Lifton wrote a book called "Best Evidence." In reading Mr. Lifton's book, based on well documented facts, it appears that after the President was killed in Dallas that the Secret Service agents with the Presidential party, apparently with the approval of Mrs. Kennedy, hijacked the President's body out of Parkland Hospital in Dallas using the threat of force.

They then rushed the body to Love Field in Dallas. Next, they covertly stored the President's body in the front of Air Force One in a body bag. Later, when the plane landed at Andrews Air Force Base in Washington and came to a halt, Secret Service officials immediately, with the help of military officials in Washington, rushed the President's body to an army helicopter which had swiftly landed next to the plane after it stopped. Then helicoptered the body to some location, (possibly Walter Reed Army Hospital), where they had 20 to 25 minutes time to alter frontal entry wounds, and create rear entry wounds.

Then they flew the body to the Bethesda morgue, before the FBI and Honor guard, to keep them from finding out that all of this was going on. This theory is backed by the F.B.I.'s original report, which reported surgery to the President's head before the autopsy started.

Returning to Dallas for a moment, I remember another incident concerning the Secret Service. The night before the assassination all the known evidence clearly shows that members of the President's Secret Service detail had been out drinking late.

Of course this incident was never properly investigated by Secret Service Chief Rowley, or the Warren Commission. But why? Was it because they had been drinking at a club owned by a friend of Jack Ruby's, in the hometown of Lee Harvey Oswald? Or was it as I suspected, that the President was also with the agent's drinking? And with the President's well known reputation, carousing with women? If so, then this would have been an excellent motive for Secret Service officials to want to cover up this incident. But I could only speculate on what was going on behind this event.

In Mr. Lifton's book it appears that as late as three weeks after the assassination, that information coming from the doctors at Parkland Hospital, who treated the President after the shooting, that the President's neck wound was inflicted from the front. And that the F.B.I. was also trying to reconstruct the shooting based on this same information. This was before the Dallas doctors recieved a visit from two Secret Service agents, who tried to persuade them that the wound was inflicted from the rear. After that time, the Dallas doctors began to doubt their own observations, and looked for other theoris to explain how the President could have been shot from the front.

Looking very closely over the F.B.I. reports on the autopsy it also appears that the original autopsy report, and it's conclusions, were destroyed. Then after Oswald was killed by Ruby, Navy officials made out a new revised autopsy report with new conclusions. Which would now coincide with the future Warren report conclusions. Then, this new autopsy report was sent to the White House, rather than to the F.B.I., who at that time were charged with investigating the assassination.

Another big mystery was why after the autopsy was over, the autopsy photo's and x-rays, which were vital evidence in determining which way the shots were fired from, and confirming the autopsy's conclusions, were kept by the Secret Service. Apparently with the approval of Robert Kennedy, and neither of these items were ever given to the F.B.I., or the Warren commission staff.

So the mystery behind the President's assassination appeared to me as follows. First the President was shot. Next, the Secret Service agents in Dallas hijacked the President's body out of Dallas, and stored it in the front of Air Force One. Then when the plane landed in Washington, Secret Service officials, with help of military officials in Washington worked together to alter the President's body before the autopsy. And it appears that this was done to keep the F.B.I. agents and Honor guard, who were both waiting at the airport to accompany the body to the morgue at Bethesda, from finding out that the coffin taken off the plane was empty.

After I had given this peticular event a much more careful look, I discovered something very peculiar that I had never noticed before. Something that had actually been described way back in 1967, in detail, by Mr. William Manchester, in his book, "Death of a President". Mr. Manchester described how after Air Force One landed at Andrews Air Force Base in Washington, and came to a halt, that Robert Kennedy immediately entered the front of the plane, totally unnoticed, and unseen by everyone there. This included all of the reporters, film crews, F.B.I. agents, Honor guard members, and thousands of people gathered waiting for the plane to arrive. Next, within seconds the attorney general ran the entire length of the plane to join Mrs. Kennedy, and the rest of the Kennedy party who were ready to debark. At the rear of the plane..

I asked myself a very logical question. Why would Robert Kennedy immediately enter the front of the plane? When he knew that the Kennedy party, and the coffin, would have to exit at the large Presidential exit on the port rear side of the plane. And why was he not waiting at the airport with all the other dignitaries? Soon I discovered a clue. The clue that I had been searching for, for almost thirty years. From carefully reading Mr. Lifton's book, over and over again, actually wearing out two copies, and having to buy a third, his documented evidence shows that as soon as Air Force One landed at Andrews Air Force base, and came to a halt, that an army helicopter landed at the front starboard side of the plane. The opposite side the Kennedy party was debarking from.

And that the Presidents body was taken off the plane, and put aboard this army helicopter to another location to be altered. All this appears to have been completed within 90 seconds, when the helicopter takes off, and because Robert Kennedy was not seen entering the front port side of the plane, where he would have definietly been seen entering the plane. I realized that the attorney general could only have entered the front of the plane on the front starboard side. This was exactly where the army helicopter was that apparently flew the President's body to be altered. So it appeared that Robert Kennedy was in the same exact area of the plane, and at the same time the body was being taken off the plane.

These set of facts, when put together, appear to show that Robert Kennedy was very aware that the President's body was being taken to some other location to be altered. The implicit impression this information gives is that the whole plan to steal the President's body out of Dallas, bring it to Washington, then alter the body, was being run by Robert Kennedy, and Secret Service Chief Rowley, with help from military officials in Washington.

I believed that this was done to keep the F.B.I., and the public, from learning the true facts of the shooting in Dallas. Once I had made this discovery, suddenly all of the mystery's behind the President's assassination began to unravel. I began to put all of the known information down in chronological order beginning in January of 1963. Starting as follows:

January 1963 - Senator Thomas Dodd, like President Kennedy (both anti gun), begins investigating gun sales through the mail. Two of the biggest mail order company's at this time are Klein's, and Seaportraders.

March 1963 - Lee Harvey Oswald orders a pistol from Seaportraders, and a 36" rifle from Kleins.

April 1963 - An unknown assailant takes a shot at General Walker in Dallas.

April 24th to October 4th 1963 - Oswald moves down to New Orleans, where he creates this fictitious A.J. Hidell character. Then he begins to connect A.J. Hidell to what appears to be at that time, enemys of the President, and his brother, Attorney General Robert Kennedy. First, 544 Camp St., (Mr. Guy Bannister). Second, the fictious Fair play for Cuba committee New Orleans, (F.P.C.C. in New York). Third, the Cuban embassy, (Mr. Castro).

October 4th 1963 - President Kennedy and Texas officials finalize plans for a motorcade through Dallas. This same day Oswald begins his trip back to Irving, Texas.

October 14th 1963 - Oswald rents apartment in Dallas under the fictious name O.H. Lee, for cash.

October 16th - Oswald quickly obtains job at Texas school book depository, which was owned by Ted Dealey, who in November 1963 was one of the worst, if not the worst enemy of President Kennedy's at that time.

October 16th to November 18th 1963 - It appears from all of the available evidence that Oswald gets a new P.O. Box, then orders a new 40" rifle from the Kleins advertisement in the November issue of FIELD & Stream magazine to his new P.O. Box. This was the same length of rifle found on the 6th floor of the T.S.B.D. building after the shooting. Not the 36" rifle that Oswald ordered in March 1963.

November 18th 1963 - Chief Curry of the Dallas police department and Captain Fritz are informed by Secret Service officials visiting from Washington about a new change in the end of the motorcade route. Which will now take it past the T.S.B.D. on Elm St.

November 22nd 1963, 12:30PM, - President Kennedy is shot in Dealey Plaza, Dallas. Many witnesses, including Dallas policemen, report shots appeared to have come from in front of the motorcade. Zapruder film also appears to show President shot from front, and shortly afterward the rifle, and two shells were found by the Dallas police on the 6th floor.

November 22nd, 2:00PM, - Secret Service agents at Parkland Hospital with apparent approval of Mrs. Kennedy, use the threat of force to hijack the President's body out of the hospital, and rush the body to Air Force One at Love Field. Then back to Washington.

November 23rd, 1:45 AM, - F.B.I. report on autopsy, sent to F.B.I. headquarters in Washington, which included information about surgery on the President's head, before the autopsy began, and that a bullet had hit the President in the back, and then fell out.

November 22nd to November 25th 1963 - Evidence against Oswald starts showing up in the hands of the Dallas Police, and Secret Service. This also includes the shooting of officer J.D. Tippett. F.B.I. reports indicate that this evidence was also planted.

November 24th, 11:20AM, - Oswald is shot and killed by Jack Ruby.
5:00PM - Navy officials turn in new typed (revised) version of autopsy report, and wounds. Then send it to the White House, instead of FBI, who were investigating the shooting.

November 27th 1963 - F.B.I. agent's who attended President's autopsy go to White House, to question Secret Service official's about their activities after the assassination, and about the new autopsy conclusions. Also appeared to conduct a special investigation of the President's limosine driver in Dallas.

November 1963 to September 1964 - The autopsy photo's and x-ray's which were vitally needed to confirm which way the shots came from, were being kept from the Warren commission staff, and the F.B.I. This apparently was being done by Robert Kennedy.

1964 to 1971 - Robert Kennedy, and Mrs. Kennedy, keep critics from seeing autopsy photo's and x-ray's of President.

1974 - President Richard Nixon mentions in a weekly press conference that if Robert Kennedy had done ten more wire taps he would have learned of the Oswald plan. Then, comments on his dislike for Secret Service protection.

1975 - Former C.I.A. director Richard Helms informs senate intelligence committee about President Kennedy's C.I.A. - Mafia plans against Fidel Castro. He also reveals that the President was looking for some type of a pretext, that he could use to attack Cuba.

1979 - The House Select Committee on Assassination finds a conspiracy to kill President Kennedy, and recommends a further investigation.

1980 - Mr. David S. Lifton publishes "Best Evidence", showing documented evidence that the President's wounds were altered before the autopsy. And from reading it, it implies that Secret Service officials were involved in the cover up.

1981 - Government officials appear to try and quell the public by digging up Lee Harvey Oswald's body, to divert attention away from having the President's body dug up and, showing that it was altered, or AS I suspect, WAS CREMATED. (this was a wag the dog situation).

1981 to Present - Government officials continue to provide news officials with false information and theoris concerning the facts behind the President's shooting.

I had noticed that all of these pieces of the puzzle, whether examined in sequence from beginning to end, or the reverse, they appeared to be interlocked. But the real key to the mystery behind the assassination, was my discovery that the President's brother, Robert, and Secret Service Chief Rowley, were trying desperately to cover up the fact that the President had been shot from the front. And along with the F.B.I. reports I have, indicated that Secret Service agents were, along with the Dallas police, planting evidence against Oswald. Including the magic bullet. But why? I believe I now had a motive.

By early 1963, Kennedy officials in Washington were plotting to assassinate Fidel Castro. But to no avail. President Kennedy wanted Fidel Castro out of Cuba by the coming election year. And was searching for some pretext for attacking Cuba. Of course an assassination attempt against the President, done by a pro-cuban linked to Cuba would be a perfect pretext.

Enter Lee Harvey Oswald, a friend of George Demohrenschildt, (a friend of Mrs. Kennedy's family). It now appears that Kennedy officials sent Oswald down to New Orleans to create this fictitious A.J. Hiddell, a pro-cuban, then they had Oswald link President Kennedy's enemy's to the upcoming preplanned shooting in Dallas. Oswald was then sent back to Dallas, to connect two more Kennedy enemies to the upcoming shooting in Dallas.

Next, Kennedy officials had Oswald rent an apartment under the name of O.H. Lee, and rent a new P.O. Box, and then order a new 40" rifle, to his new P.O. Box. He was next told to fill the apartment with communist literature, and connections to A.J. Hidell in New Orleans, F.P.C.C., Guy Bannister, and Cuba.

Then on November 18th 1963, the Secret Service, apparently with approval from Kennedy officials in Washington, changed the motorcade route. Which would now travel past the Texas school book depository building at approximately 12:25 PM. This was in the middle of the lunch hour, when everyone would be at lunch. Thereby making the sixth floor of the TSBD deserted at the time of the upcoming shooting.

Meanwhile, when the new rifle arrives, it is taken by Kennedy officials, and fired twice. The rifle, shells, and bullets were then kept to be planted later, after the shooting. The rifle, and shells on the sixth floor of the depository. The bullets, either in the limosine, or Dealey Plaza. One of these bullets, (the magic bullet) was kept perfectly intact, so that it could be matched perfectly to the rifle afterwards.

Next on November 22nd 1963, Lee Harvey Oswald, or someone else several minutes before the motorcade reached Dealey Plaza, with instructions from Kennedy officials. First locked the elevator on the sixth floor of the depository. This was done to keep someone from coming up and ruining their plans. Then just a few minutes before the motorcade enters Dealey Plaza, they planted the rifle, which had been snuck in sometime earlier, on the sixth floor to be found. Then they threw the two fired shell casings by the sixth floor window. Then quickly hurried down the back stairway, and out of the depository building.

Next, as the President passed the depository, a sniper hidden to the President's right front, using a high quality automatic rifle, (similar to an M-16) with a high quality scope, using high velocity hollow point bullets, totally unlike the cheap, slow shooting bolt action rifle, with misaligned scope, which was allegedly used by Oswald, shot the President in the throat, hitting him in the lower neck. Firing again, he next hits Governor Connally in the back of his right wrist, the bullet expanding, coming out the bottom of his wrist. Then hitting him in the chest. Then snapping off a third and final shot, hitting President Kennedy in the right side of his head, the bullet exiting the right rear side of his head.

Then, after arriving at the hospital Secret Service agent's contact Mr. Rowley, Chief of the Secret Service to advise him of the situation in Dallas. Robert Kennedy is then notified. Both then instructed the agents at Parkland on getting the President's body out of Dallas, and back to Washington, to be altered before the autopsy.

Very soon after the shooting, evidence begins to appear incriminating Oswald. From the F.B.I. reports it appeared to be planted by Dallas police, and Secret Service officials. Next, Lee Harvey Oswald, not even considered as a suspect, is somehow caught at the Texas theater, an hour and a half after the shooting, four miles away. Then held illegally for two days.

At 11:20 AM on November 24th, Kennedy officials in Washington arrange for one of their contacts in Dallas, Jack Ruby, to shoot Lee Harvey Oswald. The main player in this whole plan, to keep him from talking. Then, later that day at 5:00 PM navy officials, after Oswald was dead, turned in a new revised autopsy report showing rear entry wounds.

Next on November 29th 1963, the Warren commission was formed, it appears, to blunt the F.B.I.'s investigation into the assassination. They did this by accepting what appeared to be planted evidence. Then by keeping evidence showing a conspiracy out of their report. Thus making Oswald guilty, and avoiding exposing his government connections. Meanwhile, Robert Kennedy and Secret Service officials kept the autopsy photo's and x-rays away from both the commission, and the F.B.I.

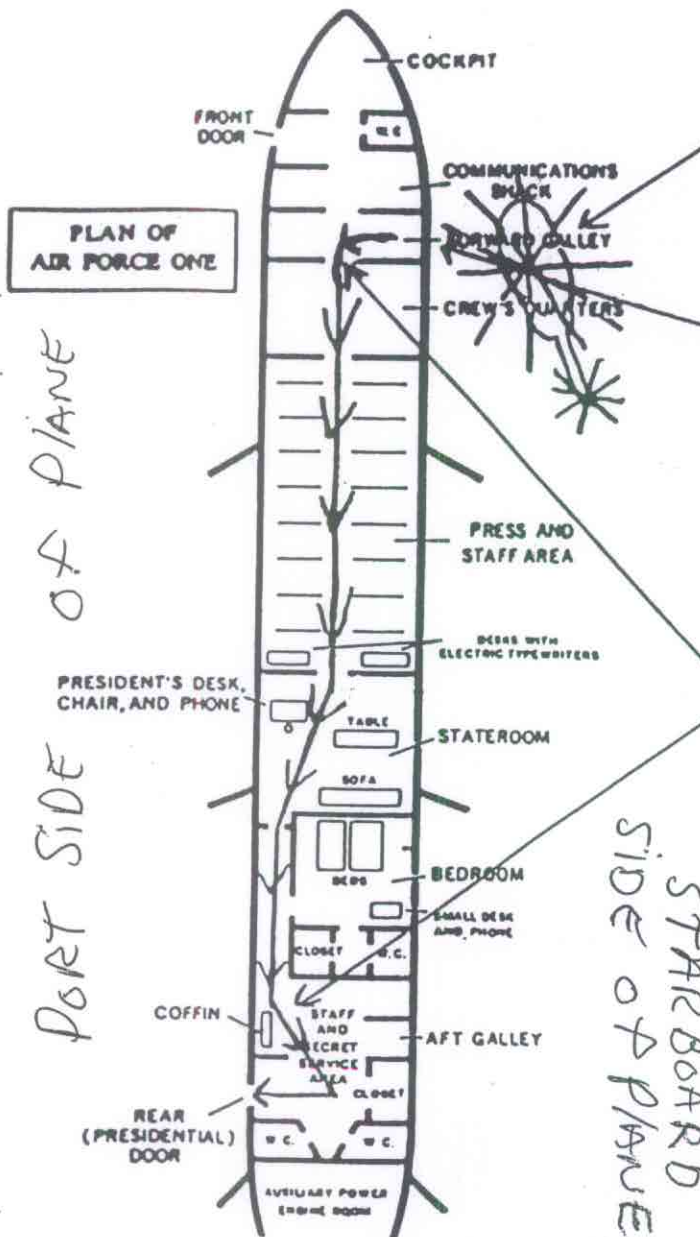

From November 22nd to this very day the United States government has been trying to keep the real facts from the American public. Fearing that there would be a public call to have President Kennedy's body dug up from Arlington cemetery in Washington, for a new autopsy, and reexamination, thus revealing the true facts of the shooting, and exposing President Kennedy's CIA-Mafia plot in Dallas. And also the fact that President Kennedy himself was behind this foolish stunt, which resulted in his own death.

One last thing that I would like to mention is the shooting of Officer Tippet. From all of the evidence available, it actually appears that there was no such officer, or that he was shot at all. But because F.B.I. reports indicate that all of the evidence in this incident appear to also be planted. The only conclusion I could come to is that this Officer Tippet was either a government contact in the Dallas police department, or was a government agent posing as a Dallas Police Officer. My suspicions were reinforced by testimony, by Jack Ruby, during his Warren commission testimony. He mentioned that he knew three Officer Tippet's on the Dallas police department. There was only one Tippet on the Dallas Police force, and this Tippet was not the one who was shot. I believe Ruby was trying to infer that there were two federal agents planted on the Dallas police department posing as officers. This Officer Tippet being one of them. This would be the motive for covering up this incident.

So, finally I now had the answers to all of the mystery's surrounding President Kennedy's assassination. All of my thousands of questions now had answers. The pre-planned shooting in Dallas, Oswald's connections, and trip to New Orleans, the magic bullet, evidence of frontal wounds, Ruby's shooting of Oswald, the stealing of the body and its alterations, the Secret Service - Robert Kennedy cover up, and the Warren commissions conclusions based totally on false evidence. But the saddest part is, that in covering up the real facts behind the assassination, the Warren commissioner's, and the Kennedy Administration officials had to let the actual assassin who shot and killed President Kennedy to go scott free.

THE END
MARCH 1ST
1998

THE ROBERT KENNEDY-SECRET SERVICE COVERUP
OF PRESIDENT KENNEDY'S ASSASSINATION.

AS AIR FORCE ONE LANDS & COMES TO A HALT, AN ARMY HELICOPTER WITH ROBERT KENNEDY ABOARD IMMEDIATELY LANDS BY AIR FORCE ONE'S FORWARD GALLEY DOOR. WHERE THE PRESIDENT'S BODY WAS HIDDEN IN A BODY BAG.

NEXT, ROBERT KENNEDY RUSHES OFF HELICOPTER, AND INTO THE FORWARD GALLEY DOOR ON THE STARBOARD SIDE OF THE PLANE. AT THIS SAME TIME SECRET SERVICE AGENTS ABOARD THE PLANE HELP KENNEDY OFFICIALS IN WASHINGTON, UNLOAD THE BODY FROM THE PLANE, AND ABOARD THE WAITING HELICOPTER. AND THEN TO SOME THIRD LOCATION TO BE ALTERED, THEN ON TO BETHESDA NAVAL BASE.

SECONDS AFTER THIS, ROBERT KENNEDY RUNS THE ENTIRE LENGTH OF THE PLANE TO INFORM THE REST OF THE KENNEDY PARTY ABOARD THE PLANE, THAT THEY WILL BE TAKING A LONG 50 MINUTE DRIVE TO BETHESDA, RATHER THAN A SEVERAL MINUTE FLIGHT BY HELICOPTER

I HAD ALSO DISCOVERED THAT THIS LONG DRIVE ALSO HAD A HIDDEN MOTIVE IT WAS A DELAYING TACTIC, DESIGNED TO GIVE KENNEDY OFFICIALS TIME ENOUGH TIME TO ALTER THE WOUNDS WHICH WERE INFLICTED FROM THE FRONT INTO REAR WOUNDS. AND ALSO TO KEEP F.B.I. AGENTS, JAMES SEIBERT, AND FRANCES O'NEIL, WHO WERE ORDERED TO STAY WITH THE COFFIN, AND BODY TO THE MORGUE, BUSY. THIS WAS TO KEEP THE AGENTS FROM FINDING OUT THAT ALL OF THIS WAS BEING DONE.

THEN, LATER AT BETHESDA, SECRET SERVICE AGENTS, AND NAVY OFFICIALS, (ACCORDING TO MR. LIFTONS BOOK) USED MORE SLIGHT OF HAND TO DECIEVE THE F.B.I., AND HONOR GUARD.

My research of President Kennedy's assassination had also helped to provide a simple solution to yet another major mystery which has surrounded the Presidents assassination. This concerning the famous backyard photographs allegedly showing Lee Harvey Oswald holding the rifle and wearing the pistol, used to assassinate President Kennedy, and kill Officer Tippett.

What I had come to realize is that in setting up a case against this fictitious A.J. Hidell and to help reinforce the idea in the minds of both the American public, and law enforcement officials, that A.J. Hidell was the actual gunman. What was needed was evidence indicating that A.J. Hidell was an actual living, breathing person, and that he had actually had possession of these weapons before this staged shooting in Dealey Plaza.

Of course I also realized how very easy a project like this would be to accomplish. Simply by having Lee Harvey Oswald, or someone else put on a phony beard, mustache, and beret, or hat. Next, having them pose for pictures, disguised as this pro cuban A.J. Hidell, along with the rifle, pistol and two subversive magazines, and very likely taken with the minox camera which according to the Dallas police reports, and testimony by Dallas Police Detective Gus Rose, was originally found in the initial search of Oswalds rented apartment on Beckley Avenue. Then, ~~Planting~~ the camera and negatives, thereby supplying the Dallas Police with a lead to go on, as well as a description to provide to the newspapers.

But when this Kennedy administration plan backfired, resulting in the tragic death of President Kennedy, in a hail of sniper fire in Dealey Plaza. The situation in Dallas had now been drastically changed. And what this now meant is that anyone involved in the creating of, or having any knowledge of these planted negatives would also be very aware that they now posed a very serious problem. Because if found, they would be positive proof of A.J. Hiddells involvement in the Presidents assassination.

This giving the implicit impression, that any scapegoat provided afterward. This later becoming Lee Harvey Oswald, Not only had pre assassination contact with A.J. Hidell, but had also aquired these weapons from Hidell, sometime prior to the assassination. Thus indicating a conspiracy involving both Lee Harvey Oswald, A.J. Hidell, and possibly others. Completely destroying any lone assassin theory.

In order to stop this from happening anyone having knowledge of these planted negatives would be forced into one of two choices. The first would be to get to Oswalds apartment on Beckley Avenue, quickly before the Dallas Police were led there, and confiscating these negatives, along with any other evidence not meant to be found. This could very well explain why Mrs. Roberts, Oswalds landlady testified that she saw a Dallas police car parked in front of her roominghouse, approximately a half hour after the assassination.

Their second choice would be to later gain temporary custody of these planted negatives from the Dallas Police. Having them developed, This explaining why no film was found in the minox camera. Next, placing them into a slide projector. Then, projecting them on a screen, wall or any other white background, and drawing or painting Lee Harvey Oswalds face over that of A.J. Hidells. While at the the same time, trying carefully to cover up both A.J. Hidells beard, and hat. This in turn, helping to explain why as many of the assassINATION critics, and also photo expert's hired by the government to check these negatives and photos for authenticity, and any possible forgery, had all noticed.

Is that in each of the photos and negatives Oswalds head appears to be unusually large in porportion to his body. Then simply inserting new film into the Oswalds family camera, which was found on the afternoon of the assassINATION. At the Paines residence, in Irving, Texas, where the Oswald family had been living at the time of the assassINATION. Then, simply rephotographing these altered projections with the Oswald camera. Then, returning the camera, with these new negatives inside, back to the Dallas Police in place of the originals.

I myself many years ago, had noticed something very strange about these photographs, which also gave them the appearance of being phony. Because, in spite of the fact that Marina Oswald had given sworn testimony that she had taken these pictures within just a few minutes of each other, when actually seen, in one of these photographs Oswald is clearly wearing what definitely appears to be both a ring on his left hand, and a watch on his left wrist, respectively. Where as in the second photograph, it is quite apparent that both Oswald's ring and watch are now missing. Indicating that each photograph was of an entirely different person.

If altered by this previously mentioned process. The photographs and negatives would show absolutely no evidence of having been tampered with. A project like this being very easy accomplished, by anyone. And would take no more than an hour or two to complete if done by government officials. And could also be done virtually anywhere, including inside of the Dallas Police Station.

Of course I also realized that Abraham Zapruder's film, taken of the Presidents shooting in Dealey Plaza, could be altered by exactly this same process. Although it would take somewhat longer to accomplish. First, by having the film developed, then altering frames indicating shots fired from the front. Then, refilming the altered original, using Zapruders camera with a new roll of film in it. Then, switching this altered copy for the original film, he had taken in Dealey Plaza.

There is in fact further evidence indicating that a chain of events exactly ~~like this was~~ taking place shortly after the Presidents assassINATION.

This being well documented evidence found by assassINATION researcher Paul Hoch in 1976, indicating that shortly after the assassINATION, and possibly within only several hours of the assassINATION.

That the original Zapruder film (supposedly in possession of the Secret Service at that time), was already at the C.I.A.'s National Photo Interpretation Center. One of the worlds most sophisticated photo laboratory's in 1963, and that work was being done on the film at that time, and that a master copy had been made from it. With three copies being made from this master copy.

This of course, definitely indicating that shortly after the assassination, that the C.I.A. was in possession of five films of the shooting in Dealey Plaza. These being the original Zapruder film, a master copy made from it, and three copies made from this master copy. Even though the known facts show that only four known films of the shooting, have ever been known to exist. This being the original Zapruder film and a copy of it, initially held in possession of Abraham Zapruder. And two copies being held in custody of the Secret Service.

This does of course raise the very likely possibility that C.I.A. officials kept the original Zapruder film showing clear evidence of President Kennedy being shot from the grassy knoll area. Then, having this altered master copy sent to Abraham Zapruder in place of the original film he had taken. Along with a copy made from this master copy, with the other two copies of this master copy being given to the Secret Service. And the likelihood of C.I.A. officials having the original destroyed to keep the American public and the F.B.I. from ever finding out about the agency's involvement in the Kennedy administrations plan in Dallas, and having to take partial, (although benign) responsibility in the Presidents assassination, and the subsequent cover up which followed. And what all of this means, is that what has always been thought to be the original Zapruder film. Which Mr. Zapruder sold to Life magazine on November 25th, 1963, for one hundred and fifty thousand dollars; is actually nothing more than a worthless altered master copy of the original Zapruder film, and that the original Zapruder film has never been seen by anyone, outside of C.I.A. personell involved in the altering and copying of it, in November 1963.

Snapping the complete puzzle together

Soon after my discovery of the Secret Service - Robert Kennedy cover up, I had also discovered further evidence, indicating that President Kennedy's body was not taken to the rotunda at the White House to lie in state. But was actually kept by Secret Service and Navy officials, very likely hidden in one of the several coolers located in the morgue's anteroom.

Then, later that day, or evening of November 23rd - 24th, they brought the President's body back out, and into the morgue. Where they now had several hours if needed to carefully reconstruct President Kennedy's head wounds, showing shots inflicted from the rear.

Then they proceeded to take a new second set of (revised) autopsy photo's and x-rays. Then once this had been completed, Secret Service agents, just as they had done the previous night, confiscated all of this new autopsy evidence. Then, delivered it to Chief Rowley at his office at the White House. For Chief Rowley and Robert Kennedy to view. To decide whether this newly created evidence looked good enough to fool both the F.B.I. crime, and photo labs. Apparently they were not, and were kept from both the F.B.I. and Warren Commission staff. Then, later switched for the originals, by either Secret Service officials, or later by Robert Kennedy.

Once all of this had been completed the next problem was Lee Harvey Oswald. The key player in all of this, sitting in his Dallas Police cell. Early on Sunday morning, of November 24th, F.B.I. agent Vincent Drain had returned to Dallas from the F.B.I. lab in Washington with Oswald's rifle. Which showed no trace of a palm, or finger prints on it, or any trace that a print of any kind had been lifted by the Dallas Police, on November 22nd.

At 12:00 P.M. November 24th E.S.T., 11:00 AM Dallas time, Dr. Humes destroyed his original autopsy notes from the evening of November 22nd - 23rd. Approximately 20 minutes after this was done, Jack Ruby shot Lee Harvey Oswald in Dallas. Later that day, at 5:00 PM, Dr. Humes turns in a new revised autopsy report, with new conclusions. Which now contradicted the original conclusions given to F.B.I. agents James Siebert and Francis O'Neil on the early morning of November 23rd.

Then, later on the evening of November 24th - 25th at the Fort Worth funeral home, where Oswald's body was being kept, according to the known facts. Federal agents, (not the F.B.I.) took a set of Oswald's palm and fingerprint's. Next, on November 26th the Dallas Police notified the F.B.I. of a palm print they had now allegedly found on Oswald's rifle.

These facts when put together on a time line, and in chronological order, present a strange picture as follows:

Early morning of November 24th - F.B.I. agent Vincent Drain returns Oswald's rifle, with no palmprint found on it, to the Dallas Police.

Bethesda Washington 12:00
NOON E.S.T.

- Dr. Humes destroys his original autopsy notes, then begins making out a new autopsy report, with new conclusions.

11:20 A.M. C.S.T.

- 20 minutes later in Dallas, Jack Ruby shoots Lee Harvey Oswald.

Evening of Nov. 24th-25th

- Federal agents go to Fort Worth funeral home, and take Oswald's palm and fingerprints.

November 26th

- The Dallas Police turn Oswald's rifle back in to the F.B.I., with a palmprint now on it.

When these known facts are once again examined in sequence from beginning to end, or the reverse, they appear to be interlocked. They appear to show that once the President's wounds were reconstructed, and a new second set of autopsy photo's and x-rays were made. Plans were then initiated by Kennedy officials, with their Dallas Police contacts and Jack Ruby, to shoot Lee Harvey Oswald.

Then, Dr. Humes was next persuaded by Navy officials to destroy his original autopsy notes. 20 minutes later Oswald is shot by Jack Ruby in Dallas.

Another fact that I had also come to realize, from Mr. David Lifton's book, explaining that President Kennedy's body is (legally) the best evidence of which direction the shots had been fired from. Is the fact that both the tissue slides taken during the autopsy, and President Kennedy's brain, were also part of the President's body and wounds, and therefore would also be considered the best evidence of which direction the shots had actually been fired at President Kennedy in Dallas.

I had noticed that the facts show that these vital pieces of evidence were confiscated by Secret Service agent's during the autopsy, and were being held in the custody of Secret Service official's in Washington at that time. With the apparent approval of Robert and Jacklyn Kennedy. And being withheld from both the F.B.I., and Warren Commission staff, who were at that time investigating the assassination. Until later, when they were transferred to Robert Kennedy in April 1965.

In October 1966, when Robert Kennedy donated the complete autopsy materials to the National Archives in Washington. These slides and the President's brain were excluded from the donation. According to fact, only the Secret Service and Robert Kennedy, or the Kennedy family has ever had custody of these vital pieces of evidence. Which would legally verify which direction the President had been shot from. And according to the facts, have never been seen, or examined by anyone outside of the Secret Service or Robert Kennedy, both of whom were never able, or willing, to produce this vital evidence for the F.B.I., Warren Commission.

Clark Panel, or the House Select Committee on Assassinations, during their investigations of President Kennedy's assassination.

And because none of these pieces of evidence has been produced to this very day, 38 years later, the implicit impression that these facts give, is that these vital pieces of evidence were destroyed. Either by Secret Service officials, or later by Robert Kennedy. Thus, confirming my theory concerning all of this autopsy evidence.

I had also realized that to insure a complete cover up, the President's body, which could also confirm which way the shots were fired from, would also have to be destroyed (cremated). This, to keep J. Edgar Hoover, or any other government officials from calling for a future disinterment of the President's body, and a new examination, and revealing shots from the front. And touching off a new investigation, which could very likely uncover President Kennedy's failed plan in Dallas, and its tragic results.

And until all of these vital pieces of evidence can be produced by the last known person's to have custody of them, the Kennedy family. And can be examined by a highly respected, and unbiased pathologist, and having DNA tests taken on them, to confirm their authenticity and relationship to one another. My theory concerning this evidence, and my well placed suspicion that the President's coffin buried at Arlington cemetery in Washington is empty, appears to be absolutely correct. And is based upon a rock solid foundation.

CONCLUSION

The Warren Commission was created to keep the F.B.I. and public from learning about LeeHarvey Oswald's involvement in the Kennedy plan in Dallas. And to protect all of the government agencies involved with helping the President set up his plan, and any of the other agencies who gave assistance in the post assassination cover up. Which explains why they all appear to have some sinister connection to the assassination. I was relieved to know that none of these government agencies were involved in either the planning of, or assassination of President Kennedy on November 22nd 1963. In the words of Gerald Posner:

Case Finally Closed

October 19, 1998

AFTERWORD

Having made my discovery that Lee Harvey Oswald (A.K.A. A.J. Hidell) had been connecting enemys of the Kennedy administration to this staged shooting in Dallas. Then next, combining this information with Mr. David Lifton's well documented evidence indicating that Secret Service officials in Washington, Dallas and in the Presidential motorcade. Joined later by Navy officials in Washington, at Bethesda Hospital. After Air Force One landed at Andrews Air Force base, six and a half hours later. Were all involved in the altering, creating, planting, switching, destruction of, and later the withholding of vital pieces of autopsy and ballistic evidence, as well as the President's body. All this done in a desperate attempt to hide the fact that President Kennedy had been shot from the front, from both the F.B.I. and Warren Commission.

Then, after my having discovered a startling new clue. In a book written by Mr. William Manchester, in 1967. A book which first had to be given a very close examination by both Robert Kennedy and his attorney's before it could ever be published, and which, finally after some changes were made, was given the full approval of both Robert and Jacklyn Kennedy to be published.

A clue, based on well documented evidence which indicates that this tampering of autopsy and ballistic evidence, was being done with the full knowledge and approval of both Robert Kennedy and Secret Service Chief James Rowley.

Once I had joined these three major pieces of the assassination puzzle together, the mystery surrounding President Kennedy's assassination, in Dallas, on November 22nd, 1963, began to quickly unravel. All of the unanswered questions ever asked concerning President Kennedy's assassination, now had answers, and explanations for each one.

I had also come to realize that in tampering with the autopsy and ballistic evidence, Kennedy officials had also destroyed any chance of the real assassin ever being caught.

All of this helps to explain another significant incident concerning President Kennedy's assassination. In February of 1967, at a crucial time. When Jack Ruby and David Ferrie, two men who could dispute many of his claims, and who had both recently died. And Robert Kennedy now a U.S. Senator, who was soon going to have to decide whether or not to run for the Presidency in 1968. Mr. Jim Garrison, an ex F.B.I. official from Louisiana, where Lee Harvey Oswald had been visiting in the months before the assassination, began a new investigation into President Kennedy's assassination. And as it appears, was trying, although unsuccessfully, to connect Lee Harvey Oswalds friends and aquantances in New Orleans to the assassination.

What I had also come to notice about Mr. Garrisons investigation, is that it contained autopsy and ballistic evidence, which at that time was known only to Kennedy officials and the F.B.I.. And because it would be very unlikely that Kennedy officials would be leaking this information to Mr. Garrison, and implicating themselves, to the post assassination cover up., and making themselves open to possible criminal charges.

The implicit impression that these facts give is that these leaks to Mr. Garrison were coming from F.B.I. officials, and anyone knows that this could never have been done without the full approval of J. Edgar Hoover himself.

What all of this implies is that Mr. Garrison along with information being supplied by Mr. Hoover, was conspiring together with his ex boss. In an attempt to do some not so subtle arm twisting of Robert Kennedy. Trying to dissuade him from running for the Presidency in 1968, for fear that Mr. Hoover could at any time uncover the Robert Kennedy-Secret Service cover up of President Kennedy's assassination. Simply by calling for the dissinterment of the Presidents body from Arlington Cemetary, and leading to the Kennedy administrations staged shooting in Dallas, and then to the C.I.A. - Mafia plots against Fidel Castro.

And it would be very naiVE of anyone not to believe that Mr. John McCone, who was well liked by the President, and appointed C.I.A. director by President Kennedy himself, and who's agency may very likely have knowledge of Oswalds trip to Russia, would not have been more than glad to give his agency's full assistance in helping Robert Kennedy and Secret Service Chief Rowley, in their desperate attempt to cover up the true facts, of the shooting in Dealey Plaza.

This also helps explain why ex C.I.A. Director Allen Dulles, who was also a member of the Warren Commission, kept his knowledge of the C.I.A. - Mafia plots from his fellow Warren commissioner's, and the commission staff.

FINAL STATEMENT'S

My research also explains many other aspects of the assassination puzzle, such as why each of the Warren Commission members appeared to have close connections to one of the government agencies, who as the known facts indicate, had some secret pre assassination contact, or knowledge of Lee Harvey Oswald. Ergo: C.I.A., F.B.I., Louisiana authorities, etc.

It also explains why Marina Oswald was taken into custody shortly after the assassination, by Secret Service and Justice department officials. Who proceeded to keep her hidden away from her family and friends, for over 6 weeks, and during that time, giving the F.B.I. only limited and supervised access to Marina. This, it appears, was being done until Marina could come up with a final version of her changing stories for the F.B.I., Dallas police, the press, and the public.

And finally, it also explains why the magic bullet was not the only major piece of evidence to magically appear in the hands of law enforcement officials after the assassination. Listed below are each of these pieces of evidence, and according to the F.B.I., listed next to each, is the agency in who's hands it magically appeared, with no legal chain of evidence:

paper bag containing Oswald's rifle	Dallas police
third shell found in depository	Dallas police
Oswald's palmprint on rifle	Dallas police
magic bullet	Secret Service
fragments found in Presidential limosine	Secret Service
three of the four bullets, and shell cases found at the scene of the Tippett shooting.	Dallas police
jacket found near scene of Tippett shooting.	Dallas police

Because none of these pieces of evidence has ever been fully authenticated by a legal chain of evidence to it's original source. Had Lee Harvey Oswald gone to trial, none of this evidence would have been admissible in a court of law. And Oswald would have been set free. Leaving Mr. Hoover and his men to continue their investigation to find the real source of this evidence tampering, (Kennedy officials), and giving Mr. Hoover blackmail over Robert Kennedy, and the entire Kennedy administration.

In order to stop Mr. Hoover, Kennedy officials, by November 29th, had persuaded the new President, Lyndon Johnson, to form the Warren Commission. To step in and take over the F.B.I.'s investigation. Keeping the F.B.I. from reaching the source of this tampering, and to keep all evidence, showing the Kennedy administration's failed plan in Dallas, and it's subsequent coverup, from becoming public knowledge, which has continued to this very day.

The Missing Pieces of the Puzzle?

While I had been researching all the known facts surrounding President Kennedy's assassination on November 22nd, 1963, I had also come to notice two other mysterious series of events taking place in the 1970's. Both of which, when the known facts in each are examined closely, and in chronological order, strangely enough, gave the appearance of having a connection to the Kennedy administrations staged shooting in Dallas, Oswald's involvement in it, and the subsequent Kennedy cover up, which I had discovered. And I will now explain each of these events, along with a reasonably logical motive behind each.

The first of these was the famous Watergate break in, in Washington D.C. I had known that on November 8th, 1963, three weeks before the assassination, and while working at the Texas School Book Depository, Lee Harvey Oswald had written a letter. Which has since been authenticated by experts from the F.B.I. and House Select Committee on assassinations as having been written by Oswald himself. This letter was written to a Mr. Hunt asking for instructions concerning his present position.

Of course, what I had also come to notice, is that after Mr. E. Howard Hunt, a man considered by most experts on Watergate, to be an intelligence operative of some kind, and very likely for the C.I.A., had been arrested in the famous Watergate burglary in Washington D.C. Mr. Hunt later informed top Nixon administration officials including the President himself. That he was demanding both financial and legal support from the administration. And that if none were forthcoming Mr. Hunt may begin revealing to government prosecutors his knowledge of previous government operations he had been involved in. Then, later after receiving this message from Mr. Hunt, President Nixon was heard on the Watergate tapes discussing this problem with Mr. Hunt, telling his aides that they were going to have to comply with Mr. Hunt's blackmail threat. Which Mr. Nixon said was not actually a Watergate problem. The President also said that Mr. Hunt's information, if revealed, could very likely blow the whole "Bay of Pigs" thing, which Mr. Nixon said would be a fiasco, and look bad, not only for Mr. Hunt, but also for the C.I.A.

Next, President Nixon sent his top aide, and chief of staff, Mr. H.R. Haldeman over to see Mr. Richard Helms, then director of the C.I.A., and that he was to tell Mr. Helms specifically that the problem with Mr. Hunt traces back to the "Bay of Pigs", and could very likely blow open the whole "Bay of Pigs" again.

Then, many years later, in his book "The Ends of Power", Mr. Haldeman gave his own explanation for this peticular incident in which he was involved in, saying that he had now believed that President Nixon's references to the "Bay of Pigs" were actually a veiled reference to President Kennedy's assassination. Which Mr. Helms who in 1963, as Director of Plans, for the C.I.A., during the "Bay of Pigs" invasion, and the C.I.A.- mafia plots against Fidel Castro, wanted to desperately hide from the American public.

From all of these set of facts, when examined closely, and in chronilological order. It appeared very likely that Lee Harvey Oswald's letter was written to E. Howard Hunt, who had been working along with Lee Harvey Oswald in some capacity, on the Kennedy administrations staged shooting in Dallas. In the weeks, or months before the assassINATION, then, several years later, when caught in the Watergate burglary, Mr. Hunt, not wanting to become another Lee Harvey Oswald and being financially ruined, or recieving a prison term. Used his knowledge of the Kennedy plan, and Oswald's part in it, as a way of forcing, or as some might say, blackmailing government officials to step in, and help him out of this serious predicament he was now involved in.

Of course all of this raises another important question. Could Mr. Hunt have been the famous "Deep Throat", who was feeding damaging information to Washington Post reporter's Bob Woodward and Carl Bernstein. Which resulted in President Nixon's resignation? This is a very distinct possibility.

A second strange series of events took place several years later, and which also appeared to have a relationship to the President's assassination, back in 1963. This concerned the House Select Committee on assassination investigation. I had noticed from the facts known about the committees investigation show that after the committee's investigation began and after many months of internal struggles and dissent within the committee which resulted in the first four chairman of the committee. Mr. Sprague, Mr. Downing, Mr. Gonzalez and Mr. Stokes being forced to resign, which nearly destroyed the investigation altogether. It wasn't until the new fifth chairman, Mr. Robert G. Blakey had been installed, as the final chairman of the committee. That the investigation finally started moving forward, and more smoothly.

But, what I had also come to realize, and as the facts show, is that back in November of 1963, Mr. Blakey had been a top assisstant, and right hand man, to then Attorney General Robert Kennedy. And therefore very likely a close aquantance of President Kennedy himself. Of course I realized that this meant that the man finally chosen to head the committees investigation into President Kennedy's assassination, was also a close friend of Robert Kennedy's. Which I had come to realize was the equivalent of having Robert Kennedy installed as chairman of the committee, looking into the Presidents assassination.

And Mr. Blakey had himself stated that he was close to C.I.A. officials. By combining this with my discovery that Robert Kennedy had been involved in the tampering, withholding, and destruction of, vital pieces of evidence, from the assassination I would be very inclined to believe, that no matter what any evidence showed to the contrary. Mr. Blakey like his close friend Robert Kennedy, was not under any circumstances going to help uncover the Kennedy plan in Dallas, and Oswalds involvement in it, or the subsequent Kennedy coverup which I had later discovered.

This appeared to be the case. Backed by the fact that when both Mr. Blakey and Mr. Andrew Purdy, the man in charge of investigating the medical evidence for the committee, had both been confronted with well documented evidence from Mr. David S. Lifton, showing that the President's wounds had been altered and while in the custody of Secret Service and Navy officials. Neither Mr. Blakey, nor Mr. Purdy, pursued this matter fully, to try and find the original source of this tampering.

This in turn helps explain why, later, near the end of the committee's investigation when confronted with acoustical evidence showing that at least one shot had come from the grassy knoll area, to the right front of the President's limosine. Forcing Mr. Blakey to reluctantly admit to some kind of a conspiracy involved in the President's assassination. Mr. Blakey chose to put the blame on organized crime, and mafia bosses linked to the C.I.A.-mafia plots against Fidel Castro. All whom were conveniently dead, and unable to dispute any of his claims. Thereby ending the committee's investigation without ever having fully solved any of the many mystery's surrounding President Kennedy's assassination on November 22nd, 1963.

There are also many other events which took place after the assassination, which also fit in my discovery of the failed Kennedy plan in Dallas, and subsequent Kennedy cover up puzzle.

Such as the mysterious, and total disappearance of Dallas Police Chief Jessie Curry in the early morning hours of November 24th, 1963. This at a time when government officials were laying out plans for Lee Harvey Oswalds murder with their Dallas Police contacts, and Jack Ruby.

It also explains why as many of the assassination critics had previously mentioned, is that, as Attorney General of the United States, Robert Kennedy, could have easily made a call to F.B.I. Director J. Edgar Hoover, and having Mr. Hoover call Dallas, and having F.B.I. agents in Dallas immediately bring either Lee Harvey Oswald or Jack Ruby, who incredibly lived three years after the assassination, back to Washington. So that he could question them concerning their real motives, or possibly discovering a conspiracy by granting them both immunity. Chose instead to ignore this great opportunity to find the real assassin who killed his brother. And withholding vital evidence, thereby hampering all future investigations into the assassination.

But after having discovered the true facts surrounding the assassination. It becomes very clear to understand why Robert Kennedy would not want to have any contact with Lee Harvey Oswald, or Jack Ruby.

I had always known that if I, or anyone else had discovered the real facts surrounding President John F. Kennedy's assassination, that it would be a simple one, which would solve all of the mystery's behind the assassination and obvious cover up. But because of all the false theory's put out by many writers. Some possibly backed by government officials, each with their own scapegoats. I can now see how such a simple solution could easily become covered up from the American people to this very day 36 years later. And why it would take these many years to find the true facts behind President John F. Kennedy's death on November 22nd, 1963.

Since my discovery of the Kennedy administrations C.I.A. - Mafia plot against Fidel Castro, set up at the Texas School Book Depository on November 22nd, 1963 in Dallas, Texas. Which had backfired resulting in the assassination of President Kennedy, and Lee Harvey Oswald's key role in this plot. This being the secret that the Warren Commission was trying to hide from the American public. The commission, made up almost entirely of lawyers, aided in the coverup, simply by not following the law, and following the legal chain of evidence rule on any of the most vital pieces of evidence surrounding the assassination. Including the Chief Justice of the United States himself, Earl Warren.

I have also been asked many times to explain another unsolved mystery surrounding the assassination. This being, exactly how was the grassy knoll assassin able to reach his position on the knoll, ambush the President and Governor Connally, and then make his quick escape from his ambush position, and all without being seen by anyone.

I realized that before I could discover the answer to this mystery, my first step would be to find the assassin's approximate location. After which, I could begin the second step, by studying all possible entrance and escape routes which could be used by the assassin from this specific location. After which, I would have to view this problem from the conspirators point of view.

By not only devising an ambush plan, but also one which fit in perfectly with all of the original reports and testimony given by every witness in Dealey Plaza. Particularly those closest to the grassy knoll. Each describing the events that originally appeared to be taking place in the minutes surrounding the shooting. Then combining all of this information with the original reports and testimony of the President and Governor Connally's wounds, as described by all of the Dallas doctors who attended each of them. In the emergency room at Parkland Memorial Hospital, immediately after the shooting, and the angles needed to produce these wounds.

After several months of carefully researching all of this known information I had been able to establish, without any doubt whatsoever, that the assassin had been firing from a location behind and approximately 25 to 35 feet west of the corner of the picket fence, on top of the grassy knoll. Exactly where author Josiah Thompson had placed him in his book "Six Seconds in Dallas", published in 1967. And according to expert military and police snipers I had conferred with, a perfect ambush sight, not only because it provided a perfectly clear and unobstructed view of both victims as they were approaching closer each second. Making each successive shot easier, but also for the fact that the picket fence being located at the top of a sloping incline, not only kept the assassin completely hidden from view of all bystanders in Dealey Plaza. To his front, and both left and right sides, as he was setting up and carrying out his ambush.

It also provided another important advantage, because the picket fence provided a solid barrier, to slow down anyone who might notice anything indicating shots fired from his position, and forcing them to either run towards the triple underpass, to the west end of the fence, 100 feet away. Or, run north to the other end of the fence located behind the arcade in order to reach his position behind the picket fence.

This giving the assassin enough of a head start to quickly exit the parking lot well ahead of any pursuer, and rejoining his co-conspirators on the other side of the fence near the arcade. Or if needed, the assassin could simply stay behind the fence, posing as a Dallas Police Officer, or Secret Service Agent, with phony credentials. While his co-conspirators, at least one, of whom, as the facts indicated, was disguised as a Secret Service Agent, were still trying to keep the parking lot cleared of unwanted bystanders.

I will now describe in some detail the ambush plans used by the conspirators to assassinate President Kennedy on November 22nd, 1963. A plan which fits perfectly with every known piece of information related to the shooting in Dealey Plaza, beginning as follows.

First, the conspirators already having learned of the Kennedy Administrations upcoming staged shooting plans, at least several weeks, or months before November 22nd, And also aware of Lee Harvey Oswald's key role in it. Their next step, was to keep a close eye on Oswald's activities after his return to Irving, Texas from New Orleans. This done in order to locate Oswald's newest place of employment, and the future site of the staged shooting. This becoming the Texas School Book Depository building located along, and at the end of the Dallas motorcade route.

Once aware of this information the conspirators next had to check the layout around the grassy knoll area. Looking for the best possible location from which to allow the assassin to enter, fire from, then escape his ambush position without being seen by anyone. This becoming a spot behind and approximately 25 to 35 feet west of the corner of the picket fence. Once this location had been decided upon, the conspirators next had to get possession of a high quality sniper rifle and telescopic sight, which could not be traced to anyone after the assassination. Moving on, the conspirators also had to get hold of a car, of no particular type, which had either been stolen, or had it's serial number removed. So that it too, could not be traced to anyone. After acquiring these two items they would then have to wait until sometime before the President's arrival in Dallas. When they would then place the rifle into the trunk of the car, and next, drive the car to Dealey Plaza, and into the parking lot behind the picket fence, to the pre-planned ambush site, and backing the car up with it's rear bumper close to the fence, then abandoning the car.

Again they had to wait until just minutes before the President's motorcade was scheduled to arrive in Dealey Plaza. When they would begin to gather near the grassy knoll area. One or more, disguised as either Dallas Police, or Secret Service, with phony credentials, where they would then begin clearing the parking lot, located to the rear of the assassins firing location, of all bystanders, and keeping it clear until the assassin had made his escape. In setting up the ambush in this manner, totally eliminated the need for the assassin to bring a rifle into, or out of the grassy knoll area. Greatly enhancing the assassins chances of making a successful ambush, and escape.

Then, a few minutes before the motorcade was due to arrive in Dealey Plaza, The assassin's co-conspirators let him slip behind the fence to his ambush position. Until the assassin saw the Presidential motorcade enter Dealey Plaza, and making its right hand turn onto Houston Street, and headed north towards Elm Street, and the Texas School

Book Depository building. The assassin then opened the trunk of the car, and grabbed his rifle. Then, taking up his shooting stance, placing one of his muddy shoes up onto the back bumper of the car, the other on the crossrailing of the picket fence, giving himself a solid shooting stance. And placing his rifle on top of the fence providing him with a solid gun rest, which was needed in making his shots as accurate as possible.

Then waiting, until the limosine had passed the Texas School Book Depository heading west toward the triple underpass, the assassin then got the President in his sights aiming his crosshairs center mass between President Kennedy's shoulder, and squeezed off his first shot. Hitting the President in the front of his neck, the bullet lodging in his chest. Then moving his crosshairs, just a touch, center mass between Governor Connally's shoulders. He squeezed his second shot. This at a time when Governor Connally was in the middle of making his turn to his right to check on the President after the sound of the first shot. And with the Governor's right wrist now positioned in front of the right side of his chest, causing the bullet to hit the back of his right wrist, and exiting the palm side of the wrist. Exactly as indicated by the original notes made by the doctors who treated the Governor's wounds at Park Memorial Hospital immediately after the shooting. The bullet then smashing into the Governor's right chest. Then next, with the President much closer, and slowly coming toward him the assassin got the President back in his sights. Only this time placing his crosshairs center mass on the President's head, taking careful aim over the next several seconds, then squeezed off his third and final shot. Striking the President on the back right side of his head, the bullet exiting the top right rear side of his head. And seeing the results of his fatal shot striking the President, snapping his head backward, and to the left, away from his firing position to the right front. Exactly the movements of the President's head as seen on the Zapruder film. As the President's brain and blood matter exploded backward over the trunk of the limosine and leftward, also striking the two Dallas motorcycle officers who were riding to the left and rear of the Presidential limosine, striking them with such force, that one of the officers had actually thought that he himself had been shot. And as pieces of the President's skull came flying off, towards the rear. With one large piece, as the facts show, landing on the trunk of the car. A piece which Mrs. Kennedy tried to reach, as she climbed onto the rear of the limosine, just seconds after the final shot was fired.

Then after seeing his fatal shot hit, the assassin immediately jumped down from his firing position, and tossed his rifle into the trunk of the car, slamming the lid down. Then, either made his quick escape northwest towards the arcade to rejoin his fellow conspirators on the other side of the fence. Still there posing as law enforcement officers, blocking bystanders from entering the parking lot. Or the assassin, if also posing as a Dallas Police Officer, or Secret Service agent, could simply stay behind the fence, and fool Dallas Police Officers, headed for what they believed was the actual source of the shots. From behind the picket fence.

And as the facts show, either the assassin, or one of his co-conspirators when confronted by Dallas Police motorcycle officials headed up the grassy knoll, posed as a Secret Service agent, with phony credentials. Then, over the next few minutes as the grassy knoll area filled up with police and bystanders, the assassin and his co-conspirators simply blended in with the large crowd, and made their escape from the knoll and out of Dealey Plaza, never to be seen again.

After having discovered the ambush plan used to assassinate President Kennedy, one which did not require the assassin to bring his rifle either into or out of the grassy knoll area, had also helped me to solve another unanswered question asked by many of the authors, and critics of the assassination. Which had never been fully explained. Even by F.B.I. Director J. Edgar Hoover, back on November 12th, 1964. This question being, although the Dallas Police radio broadcast in fact pinpointed the snipers nest on the sixth floor of the Texas School Book Depository, which was already being searched by law enforcement officials, within eight minutes of the shooting. Why did it take the Dallas Police forty minutes to find the snipers nest, and fifty minutes to find the Carcano Rifle.

I already knew that there was evidence indicating that the snipers nest was created after the assassination. But the long delay in finding the Carcano rifle also had a logical explanation. Because I realized that Lee Harvey Oswald had no need to bring a rifle to the depository on the morning of November 22nd 1963. All that would be needed to link A.J. Hidell to the shooting were the two, (as the original Dallas police and F.B.I. reports show), Carcano rifle shells found by the sixth floor window shortly after the shooting, which could easily be hidden in a pocket, or lunch bag. Then, planted by the phony snipers nest just seconds before the Presidential limousine reached the depository. To be found later after the shooting by the Dallas Police, who would then discover that they were 6.5 mm shells, which had been fired from a Mannlicher-Carcano rifle. This in turn, leading federal officials, (the F.B.I., and U.S. Postal Service), to find a mail order receipt for a Mannlicher-Carcano rifle sent from Klein's sporting goods, just weeks before the assassination, to a post office box rented by Oswald, under the name A.J. Hidell. And very likely using the phony A.J. Hidell identification he had on him when arrested by the Dallas Police.

This information, would then again lead the Dallas Police to A.J. Hidell's apartment on Beckley Avenue where they would discover the Mannlicher-Carcano rifle, AND BACKYARD photo's of A.J. Hidell holding the rifle. Along with plenty of communist literature, and connections to Cuba, and several other Kennedy administration enemy's. THUS giving President Kennedy a pretext for attacking Cuba, and eliminating his biggest enemy-Fidel Castro. While having his brother Attorney General Robert Kennedy, investigate all of the other Kennedy administration enemy's appearing to have had previous contact with A.J. Hidell.

But once this C.I.A. - mafia plot had horribly backfired resulting in the death of President Kennedy. If the carcano rifle were to be found at the apartment on Beckley Avenue. And because Oswald was in fact not at any time, by anyone, seen leaving the depository building. Nor any time after that, until he reached the Texas Theatre, carrying a rifle, this would be positive proof of Oswald's innocence.

Government officials would have to quickly get to the apartment on Beckley Avenue to confiscate the rifle, then bring it back to the book depository, and sneak it in, and plant it. Then, alert the Dallas Police to it's planted location. And considering that the driving time from the Texas School Book Depository, to Oswald's rented apartment on Beckley Avenue, is approximately twenty minutes with a twenty minute return trip. Allowing five extra minutes at Oswald's apartment to confiscate evidence eliminating Oswald as the assassin, or that would indicate a conspiracy. Including the carcano rifle, and allowing another extra five minutes for government officials to sneak the carcano rifle up to the sixth floor of the Texas School Book Depository, to be planted, and found. This providing a totally and reasonable answer to explain the fifty minute delay in finding the rifle. Which was caused by officials having to wait until the rifle had arrived from Oswald's apartment, where it had been originally planted to be found. This again explaining Oswald's landlady's testimony about seeing a Dallas Police car parked in front of her rooming house, approximately one half hour after the assassination.

Continuing on my research, with another mystery surrounding the assassination, which strangely enough, was created by the Warren Commission itself, and then never solved by the commission. This, concerning the whereabouts of Lee Harvey Oswald immediately after the shooting. And for the fact that the commission gave two totally conflicting accounts of Oswald's whereabouts, and at almost exactly the same time.

The first version the commission gave was that between one minute and fifteen seconds, and one minute and thirty seconds after the shooting that Dallas Police motorcycle officer Marion Baker, and the book depository manager Roy Truly had confronted Oswald in the second floor lunchroom, drinking a coke.

The second version the commission gave about Oswald's whereabouts, is that Oswald had left the book depository approximately two minutes after the shooting. Then traveled four blocks east on Elm Street where he next boarded a bus traveling west, back toward the book depository. Then got off after one block between Poydras Street and Lamar Street. Then, he walked another three blocks south on Lamar, to the greyhound bus station, where he allegedly caught a cab, driven by cab driver William Whaley. Who then drove Oswald to 500 North Beckley, halfway between his apartment at 1026 North Beckley, and the Texas Theater where he was later arrested by the Dallas Police.

The problem created by this second version is that William Whaley's original log book, showing each of his fares that day, which was given to the Dallas Police. In fact shows that he had picked up Oswald at 12:30pm, at exactly the same time that the assassination was taking place in Dealey Plaza, five blocks away, give or take a few minutes. And of course Oswald could not be in two places at the same time, five blocks apart. And in order for this second version to be true it meant that Lee Harvey Oswald would have had to have left the Texas School Book Depository sometime around 12:00 noon, in order to make his long eight block journey ending

at the greyhound bus station:

What all of this means is that one of these accounts of Oswald's whereabouts immediately after the shooting, was entirely fabricated, either by Officer Baker and Mr. Truly, Or by cab driver William Whaley. Or the possibility, because of all the inconsistencies in each version. That both versions were contrived, and that Oswald made his way from the Texas School Book Depository in some manner unknown to anyone. And until some further information concerning these contradicting stories should surface helping to clear up this mystery, it will remain a mystery. Although it does appear THAT both of these versions had one thing in common, they both gave Oswald an alibi, indicating that he was not at the sixth floor window at the time the shooting was taking place. But that some other unknown person, or persons, were.

And finally I would like end with my own personal theory concerning Lee Harvey Oswald's alleged shooting of the mysterious Dallas Police Officer named J.D. Tippet. An officer who allegedly worked for the Dallas Police Department for over ten years. This despite the fact that all the evidence, Or should I say complete lack of evidence concerning Officer Tippet. And the circumstances surrounding his death, at 1:15 pm on Patton Street shortly after the assassination, INDICATED exactly the opposite on both counts.

This is based on all of the known facts concerning this peticular incident such as: The Dallas Police Department, although one of their fellow officers had been gunned down in cold blood. The Dallas Police Department at no time produced any files on Officer Tippet. There were also no arrest records for Officer Tippet, which may have revealed a motive by someone, to want to harm Tippet. The Dallas Police also had no registration, or serial number, for Tippet's service weapon, or qualification records. And when asked by the F.B.I. to produce a picture of Officer Tippet to show to witness's shortly after the alleged shooting took place. The F.B.I. did not receive a picture of Officer Tippet until ten months after the assassination. After all the witness's had already testified months before.

Also at the crime scene itself the facts show that the Dallas crime lab took absolutely no evidence from the scene of the shooting. No blood samples, no measurements were taken, except for one bullet and shell, allegedly found at the crime scene. With the F.B.I. unable to match the bullet to Oswald's revolver. The other three shells and bullets not being found, and turned over to the F.B.I. until four months after the assassination. And the F.B.I. also unable to match these three bullets to Oswald's gun.

The facts also show that no autopsy report was made out on Officer Tippet, or at least given to authorities. And the last strange occurrence in this incident is that the record indicates that although Officer Tippet had been killed instantly at the scene. That an ambulance had arrived at the scene of the shooting, and the attendant, deliberately tampered with evidence, by illegally moving Officer Tippet's body from the scene of the shooting, before Dallas Police crime lab detectives could examine the crime scene. And all of this done before Dallas Police Officers, located only several minutes away, had arrived.

Having studied all of these strange happenings I had come up with a reasonable and logical theory to explain all of these rather bizzare events taking place at 10th and Patton Streets, And a theory which accounts for the total lack of evidence in the shooting of Officer Tippet, which I will now explain.

My theory is that shortly after the assassination some person, or persons, having an important role in the events surrounding the assassination were driving in the Oak Cliff area of Dallas, just over a half an hour after the assassination, in Dallas Patrol car number 10. And by 1:15pm became aware, either by the patrol cars radio, or some other source, that Dallas Police and Federal Officials were in the Oak Cliff area, trying to track them down, and arrest them in connection with the assassination, And making them a scapegoat in the Presidents death.

And knowing that it was totally impossible to hide a three thousand pound Dallas Police car, with the number 10 on it, And that they were about to be spotted any minute. They did the only thing they could do in this situation. They pulled the patrol car over to the curb on 10th Street just east of Patton Avenue, then jumped out. And abandoning the car, then quickly fleeing away on foot.

Then later the Dallas Police and government officials, after Lee Harvey Oswald had been captured, totally fabricated this story. And witness's to the actual facts were later intimidated by government officials to go along with their fabricated story. As many witness's had testified had happened to them. And stating that their original statements and testimony given to the Dallas Police, and F.B.I., had been altered, or suppressed. This phony story created by government officials, only so that they would have an excuse to illegally hold Oswald in custody, until two days later. When government officials had arranged with their Dallas Police contacts to let Jack Ruby into the basement of police headquarters, and kill Lee Harvey Oswald.

And several days after the assassination, with J. Edgar Hoover and his bloodhounds hot on the trail, and on the verge of discovering the Kennedy administrations C.I.A.-mafia plot in Dallas, and Oswalds key role in this whole plan. Kennedy officials pressured the new President Lyndon Johnson to form the Warren Commission to take the investigation away from the F.B.I. And stopping Mr. Hoover from having blackmail over Robert Kennedy, and the entire Kennedy administration. The commission accomplished this by not doing a full investigation to find the original sources of all this legally inadmissible evidence against Lee Harvey Oswald.

THE END
