Dirty tricks are still going on in Washington by the secret service whose notorious bungling of security is evident by their enlisting questionable security risks to do such dirty tricks for them, one such attempted dirty trick occurred right here in El Paso, causing me to believe they have the Ford's like prisoners in the White House so far as citizen access to them is concerned.

Many of us engaged in investigative work have known all along that a secret service agent killed President Kennedy in Dallas, with one well-placed bullet, fired from his pistol at a close range, and from the front in a conspiracy involving syndicated policemen, the C.I.A. and secret service. Those not opposing a coverup to protect our Nation's Political and Religious Leaders, including the Kennedy's, from a sex scandal were not killed off, paid off or threatened with harassments, instead word got around promising a public and complete exposure of the coverup in ten years:

With all the recent efforts at re-opening investigations found with faults in them, and believing the truth is bound to come out soon anyway, and feeling sorry for Mrs. Ford being misunderstood in our society of sex hypocrisy by her realistic and frank attitude toward sex with a possible loss of 20 million votes for her husband, decided to prepare synopsis of assassinations where sex was used to stage them and the fear of sex scandal caused their coverups, giving her husband first chance to accept or reject them as evidence for

re-opening investigations that might well get him 40 million votes, for her sake.

On Sept. 28, 1975 I sent Mrs. Ford a Mailogram to expect these synopsis on advice of a former federal agent now in the optical business and a friend of mine, or such writings would not get thru to Mrs. Ford otherwise.

The reason I sent these synopsis to Mrs. Ford instead of the president was my thinking she like myself might be a woman's libber and in return help me liberate my two lovely young daughters by my much younger Mexican ex-wife whom I rescued from a syndicate planned future for her, despite a conspiracy by some San Diego Police and Vice Consul McCoy never to allow her to immigrate thru Tijuana forcing us to go to San Antonio to get her immigrant visa because they claimed she was a prostitute in Chicago when 19, and later re-married to an admitted syndicate character claiming to be rich but wanting control of my daughters by adoption or deport her for her past record, Chauvinist males never forget though guilty of dragging her down themselves, me, fearing such a future in store for my beautiful daughters. _____

Now the badly planned dirty trick attempt in El Paso.

It seems reasonable to me with so short time to investigate more, some high up man in Secret Service in Washington became alarmed and afraid on finding my synopsis of four major crimes so

accurate and incriminating, especially that one of their agents killed Kennedy in Dallas, withheld such synopsis from the Ford's, deciding something drastic had to be done at once to take the pressure off them now building up to do something to protect the President, over-reacted, assuming I must be a dirty old man to write the Ford's anything about sex, likely smoking, drinking, even using marijuana and being a Texan must have a pistol around and living in a border city must be associating with trashy women, did select one such female to try and tempt me to get with her with a pistol and marijuana so they could shoot me or imprison me or, worse yet, get me in a psychiatric facility where they could give me some of the communist medicine to make me forget or not remember or not care, being used these days by them, thereby improving their declining image.

They certainly goofed big by not doing their home-work first and better and finding me to be exactly the opposite type on every count, as the Grand Old Sheriff Gene Biscailuz of Los Angeles County always advised doing, and who taught me in investigative work since Gardena, California high school days and for many years after, served him as citizen informer on sex crimes by the privileged groups, covered up by the aid of each other, until Chief Of Police Parker took the gun permits from all we Citizen Sheriffs who served the sheriff without pay and ended citizen participation in crime prevention.

Second Goof: sending a young shabbily dressed girl into my offices claiming to be 21, I doubted for all young girls want to be 21, also claiming to be a Mexican orphan living with a man found to be married now ordering her to rustle for her own living, begging me for help or work. After giving her some money allowing her to put labels on cabinet drawers, she spotted a big pistol, getting excited asking me to loan it to her three days, thinking she joking or crazy, asked her why not one of the little specials, she asking me would you buy one for me, my answer may be found to be wrong for she came the next day thinking she had me set up, asking for money to buy marijuana for a big party Wednesday night and over into Thursday.

Third Goof: allowed me thru another girl I had befriended and gave her money to meet this girl Wednesday night to bribe or influence her to reveal her schemes and learn within 30 minutes of the planned raid Thursday, me picking up my friend, the ex-agent, to be here with me, who advised me to search for planted marijuana and he hid out in the small TV room I use for rest and the news until traffic slows down. My friend ~~answered the~~ telephone saying the feds are on their way. Soon came two men starting giving me the third degree, asking to come in my private office, asking me where the gun was I had taken to my trailer. They demanded I write, print and type three envelopes to the Fords. Started to photograph me with two cameras, demanding names of all children, if ever arrested and if I intended to write the Ford's again and would I

voluntarily agree to Psychiatric examination, or if I wrote the Fords more they would get a court order forcing one and who else I had sent such writing to, me stalling for time on that one, realizing they were afraid of any more writing sent out, asking me to call them next day after consulting my typist who I had given a mail list out, they demanded her name and wanted a sample of her typewriter, me telling them she used the college typewriters and I would not involve her any way, me asking them why they were only interested in the Kennedy assassination synopsis and not the other three sent, the older man got up and started toward the door of the TV room, me refusing him to enter telling him he had no search warrant and was violating my rights in many ways.

The next day on calling, contacted the younger man of the two below the other, and told him about a mailogram I had sent warning him I had the right to know if my writings were stolen from the Ford's and he got excited asking did you send a message, read it to me, which I did, he telling me the answer would have to come from a higher-up man in Washington and please not call back, wait for them to call me, and told me he must make a call to Washington at once and hung up.

Now I am asking all concerned Citizens to come to my reception room where all my synopsis are on display for reading

and deciding if I made any threats to the Ford's or if like I think, their charges are pure hogwash to scare me into withholding investigations as I have done so far through fear, then assist me in flooding Washington with letters demanding the return of all illegal and wrong information stored there against me and start from the top and clean out Secret Service of holdovers by seniority who might be endangering the President through stupidity at taxpayers expense, maybe some of the group of killers themselves and not involve newer, younger men acting under their orders.
