Luthonvi21e, 4i. 21093

At. 12 , Frederick, $^{2}$ N. 21701 $5 / 16 / 77$

Dear Mr. Reppert,
Thanics for your $5 / 16$, here toung, enu the two enclosed Sundey Macszine pieces.
I reed the second and the AP gtory it had on the State wire. The local pollo uood it the next cisy. The alitor, who is a Priond, esved that and the seccud riece for me. Dot 1t from him zhen we ained there Sandsy.

Becatse you eny nothing alout ooving hure I taice it jou liave changed your minu.
The BEI p.T. people fisled ail of you. There are no spectrosprsphte thpes. Tapes As they relate in thits case are those of aoding machines usci in neutron activation analjess. What I have of thie neture is not linetted to the testing oi the zarbifin danta, although just about avozyzae says and anpumes that.
 If you purzie this it will save you much money und tive and w11 give jou bonciste for which under othar elrcunstenoes I oould not take the tire:

I aepis nothing pe-3onel $5 r 0 m$ the and there sen be nothind personai in it for ae. I em far paat tho point in wy witing whore I wougd incluede the finforsntion fin any booic.
 it but this is preokeely whet 1 did with the first spoctro matarini I recesvac. It was at a press confe ence in ${ }^{4}$ en Yoric Cits the end of April 1575 , the day before I wan to aderress a meatine at IITV las achool. If the Sun were to join, which 险 counsel has upproved, it would heve first use, otc. Were yeu to do $E$ ztory thero is much I have you'a be welgone to, picturas that ero rolevant, etc.

In about four woeks I plan e trip to eolieot mors afiliavits to isie in thie euit.
While I could not teke the tise to help with a aeperate aut I woule strangly obcourage the Sun to consider engeging my onumel as concourcel. It is his wort on thit asse in the
 four regur ring the FOIA 1974 suendmonts. If you co not huva that Gonersestionsl racond I do. Becausg I have nothing personal in thie I wonld give him any kind of welanso ouyone would want. I do have discorery material others do not obtain by duplieating my requests. I have tuah relevant acientlifio iuterature, trenscripts of haaringe and depouitions, etc. And, of course, ite has atquired a consideratio knowiedge of fact in eddition to what I believe is close to unique PorA experience. We have yet to eife a dry wsll.

Hy futexubtis in titis are now cssentisily taos to bring to light whet I can and to perfect tho axchive I will leave. I see no isterary intereet in this nos. Ny wisitirg interests ane elsawhert and fxuetrented.

Whatever courae the Sun elects it ia still welcow to copies of all I've obtaineri. I have a good copying macilne, they can be copied localiy, counerod $21 y$, which costs more, or you or your counsel can go over what I have and copy selectively.

The possibility of the most costiy wastes of tion for the papar/f and its counsel are real. As one example there is the curbstose sald to have bean hit by the "nissod" bullet. Helly fue have thrae different veraloos of what doos and doos not exdet by way af tots on it, all umer oath by PIII lab agente, prosent and retired. If you don't take tire in this matter you'1I get nothing except whet I give you. I think more exists and I think I can prove it.
 timp to disecuas your onld. However, ainou then another alternative has occurred to me, it it intereuts the Sum. I 谄ve in heryiand so I can file in feceral aiatrict court in Baltrinore, whore you to business. You also can ille there, as you cen in lashington.

A dujlioating sifit wolld be frivalous. Dut weth rhat fees and I here Inamed in theds case I woulh suggent a vich more inciusive ruit. The posaibilisisas are fantasticathgx , journolistic and hiatoric. shy was. . 11 ways.

If eny of your peopie want to talk to "ober hie ufice nuesbor is 202/22j-5507. He also has an office in hia home, 202/484-6025. I'11 next be with him on another ease a woek inom todky.

You us the piraso "pomplete balisstios svitionee." $Y_{C u}$ do not know the FII it you thinis they ${ }^{*} 21$ admit haviug hat you would rogerd as "couplete belilstios evidence." Also, you sppaar hot to Lave lewow of the neutron activation testinc. Thas FII Was fercet into this and kept it protiy Euch sucret, as the Cemilsetor aloo did.

Äside from sumject intarst I beliove POIA is ons of tha nost cimocratic of Aets, essentiel to meaningiul Areecion, to rejcesantative epcioty and ísportant to thas prace,

 preserve thin lus and tumsinc aside the efforts to gut it.
