Dear Frank,

Here are the book and the Congressional Record insertion of the second of the transcripts I mentioned. I laid aside a partly-written book on Oswald as an agent to sue for these. They capitulated on the second after we exhausted administrative appeals, something you would not dream of from the covering letter. I'll be returning to that book when I can, meanwhile keeping after "them" for more than I've gotten since getting these.

On the records of the case in which most recently but not for the first time I charged and proved perjury against the government, in this case the FBI, Jim and I have problems. I'm not retired. I'm just broke and working about two days each day. Jim is just starting practise, is doing mostly important and pro bono work for which others get credit while doing no work and even has to be his own baby sitter. So, we can xerox the records for you but neither of us could pay for it. Including three transcripts of calendar calls my guess is it would run maybe 250 pages. He should do it because he has all the records and pays only a third of what xeroxing costs here.

There also is much that I think will interest you in a book I'm getting ready for my own printing now. It will be a long assassination book but it has a documented record on Hoover and the FBI that I think is more significant than anything I've read.

If you ever get to Washington (I'm an hour away) I think it would be helpful if you and Jim could talk. He needs help on cases for me that hold considerable potential, including financial. In some areas I believe these will go farther than other recent cases, in terms of violations of rights and damages.

Most lawyers, including liberals and progressives, get scared when they hear the word "assassination." In part this is tribute to LBJ's political wisdom in coming Warren into heading that Commission. In part it is because they lack knowledge. I have never been pursuing a whodunit.

You may have forgotten, but I go way back in these things. I don't know anyone else who got an UnAmerican committee agent convicted. I did. There is a long and continuing Federal interest in me. It only began when I made the Dies effort to frame ~~me~~ kick back on him. I have copies of some CIA files on me (they still dispute in writing that any exist), have the identification of military files from official records that as of yesterday the military insisted do not exist, and many other proofs in this area alone. There is overt fraud of which I'd rather have Jim tell you. (Jerry promised to help on one case where I have copies of editions of reprints not accounted for. This was when I gave him the Minuteman file of which you know. But he didn't even respond to requests for the return of that material.) In one of these cases, where I could represent myself, my recovery was 100% plus interest plus costs out of court.

Of a different nature, because of the unusual life I've led, Jim will tell you that we refused a \$5,000 offer of out-of-court settlement. Rather than my opinion, I'd appreciate it if you'd ask him his opinion of what can be recovered in that one. It involves one of Earl Warren's closest friends and what he did to me.

Give Jim a couple of weeks to complete the appeal in the Ray (King) case in which he has already started a new precedent (right to discovery under habeas corpus) and
