Dear Harold:

After several days of effort I must give up in my attempts to have the money sent to you from this end without an invoice and am enclosing an invoice for you to sign and mail back to me in the stamped enclosed envelope. The bureaucracy covers everything with paper.

Today George came by and gave me a glowing description of his and Gary's (Chriske) telephone conversation with you. They were delighted to have Harold Weisberg talk to them and with such ease and so clearly on two subjects! You genuinely stimulated them to do their best in an objective way given their limitations and strengths. Both wish to expand their papers, but Gary especially is consumed with the question, especially the fact of Tague's relationship to the cover-up, and all that implies to history and to reality. Ultimately I hope to xerox every ~~thing~~ Tague item ~~y~~ he generates and copy every tape etc. and file it separately in a Tague file to be added to and expanded for research purposes as the years go on.

The two enclosed letters are self explanatory. I did not send Howard a copy of the letters. The one on Lane comes from the DeAntonia files on Rush to Judgment and has an excellent sentence in it that you will cherish. I am not clear on the public use of this letter so I send it to you in confidential category only. As I work through the file I will send you more.

I am working on CD-1 today and am looking for themind stuff.

Your cassettes will be assigned an arbitrary locating number and a gneral title of ~~Wixx~~ Harold Weisberg Assassination Collection or Harold Weisberg Archive and will be duplicated. Thus HW-101-c --- Later I will send you a typed format with brief running description of the several tapes. your instructions on a couple will be followed.

Dreyfus announced for the governorship and will keep on as Chancellor. He is running as a Progressive Republican.

I have been literally swamped with classes the whole semester but now can, to quote a recent famous president, see the light at the end of the tunnel.

Our kids are not quite sure what you and Ilil do except that you work with documents and are looking for Presidnt Kennedy's assassin. They remark about you both from time to time and were tickled to have spied your name Harold in the wire release on the FBI documents. Elaine sends her~~x~~ best to Lil as does her husband.

adios

Dave

Dear Mr. Reselius,

I'm most curious about your transmission of the Bertrand Russell material. My lawyer has in his possession a statement from the Bertrand Russell Peace Foundation that my name would never be used in connection with any film material about Lord Russell.

To begin with I held you blameless in the matter since you obviously could not be aware of the relationship between Russell, the Foundation, those who ran the Foundation and myself. Having met Russell in London some years ago, I suggested to him that I do a film obituary with his cooperation. He was delighted with the idea and I spent three weeks in Wales filming him. However, from the first day I knew it would be impossible to complete the film with any political or artistic integrity because of the mad and egotistical interference by Ralph Schoenman, then his secretary, and the ego-mad intrusions of Mark Lane who saw himself as somehow involved with Russell. The difference in stature is sufficiently great to make Lane's presence silly. However once in I couldn't get out without offending a very great man.

When it was all over I agreed to turn over the footage to the Foundation (in these days Schoenman personally) with the express understanding that my name would never be connected with the project. I never consider a film my own unless I structure and edit it and in this case not only the film was uncut; it was unfinished and I had no intention of finishing it.

Therefore to return to the beginning, I'm most curious about how it fell into your hands, who sold it to you, why my name was used, who gave you my name, etc. Can you be kind enough to let me know as far as possible?

Sincerely,

Ernie O'Ann

November 29, 1977

Dear Dr. Wrone:

I am writing regarding the Howard Roffman tapes produced from the Symposium at Stevens Point in November of 1976.

On November 22, 1977, I held an open house to parents of the school district. We had just over 40 parents and students in attendance and many requests for a reshoving because of a home basketball game at this school the same night.

The reaction of those in attendance was overwhelmingly in support of the point of view presented by Howard Roffman. Reaction varied from disbelief and frustration to mild outrage. One man in attendance inquired about a possible petition or other action which he might take. There have been a minimum of fifteen (15) people who have requested a reshoving and this will be done in 2 weeks.

Thank you again for all your help and encouragement. If there is something I can do for you sometime, please let me know.

Respectfully,

F. Charland
