

Dear Kathy Cunningham,

4/10/92

Thanks for the thoughtfulfulness of the SASE.

Because at 79 I have many illnesses and an of limited mobility it is not now possible for me to locate and go over the results of the NAA testing that I got but you can get them at less than my cost would be.

I filed against both the FBI and ERDA, formerly AEC and now I think Department of Energy, Germantown, Md. As I'd hoped, ERDA did not want to be involved in the court case so they just packed up what they had, at least all they admit having, and turned it over. The man who handled it may still be general counsel. As I remember the name it is Bertram Schurr. If not that, close.

The records given to me ~~me~~^{me} were just a large stack, not broken down or organized, so you'll have to go over all of them to get what you want.

You may not want what might be more costly, pictures of the paraffin casts.

Once records are released under FOIA anyone can get them.

It is a good idea to put FOIA request on the envelope.

I do not know what your project is and there is no need to tell me, although when you are finished I will be interested. If I knew perhaps there might be something that could help you in what I've written. So, I'll enclose a list.

There are more fantasies about George De Mohrenschildt than hairs on some dogs. I do not believe that he was specially hired by Brown & Root, LBJ's moneybags, certainly not in any "upper executive capacity." And before long he flipped out.

You are wise to want a second source but among the so-called JFK assassination experts two often is not enough. They make so much up out of nothing and then distribute it to those who do not have the knowledge or experience to question them.

FBI Lab SA Francis Gallagher controlled the tests in which you are interested. They were at Oak Ridge. I never made any request of Oak Ridge. You might want to.

Good luck and best wishes,

Harold Weisberg

Dear Mr. Weisberg,

I am sure you get hundreds of requests for information every-day, so I would not have contacted you if I could find this information through another source.

I have your books, & saw in the back of POST MORTEM the paperwork on your own FOIA law suit for the results of NAA on the paraffin casts of Lee Harvey Oswald. My research associate and I have been trying to find the actual results of those tests. I have enclosed a self addressed stamped envelope, and will gladly pay any costs that you must incur as a result of this request.

We specifically need the actual breakdown (barium, antimony, etc.) with their values, for each cast.

It has just occurred to me that perhaps you might be able to help us with another problem we have been unable to resolve. We have it through one single source that George deMohrenschildt was hired in an upper executive capacity by Brown & Root, very shortly after the assassination. We can not find a second source to back this up. Letters to Brown & Root remain unanswered, we have been unable to obtain older copies of Standard & Poors, and Mr. deMohrenschildt's WHO'S WHO bio states that he worked for Waldem Dil. Would you have any information which could help us determine if there is any truth to deMohrenschildt's employment at Brown & Root?

Thank you so much for your assistance in these matters. Please enclose a note with any forms you may send with an estimate of the costs you have incurred, I will reimburse you promptly.

Sincerely,

Kathleen Cunningham
