TOP-SECRET FILE says an agent posing as Oswald was shot to death by Jack Ruby to keep him quiet.

JFK was killed by a Russian agent

... KGB spy reveals chilling truth at last

A top-secret KGB file finally reveals the truth about John F. Kennedy's assassination: He was shot by a Russian agent posing as Lee Harvey Oswald.

That's the shocking disclosure of a former Russian intelligence officer who says he's read the entire sensational file.

Hot on the heels of the recent news that Soviet agents are trying to sell KGB secrets to American TV producers, the spymaster spoke out for the first time about the KGB's JFK murder file.

"I saw these documents while working as a KGB agent during the past 10 years," the officer confided in an exclusive ENQUIRER interview in Moscow.

"That's how I know it was a KGB agent, looking almost exactly like Oswald, who assassinated JFK.

"The real Oswald was in Russia when Kennedy was killed in Dallas that day in 1963. Oswald was murdered soon afterward."

Descriptions of Oswald on his military records don't match those on the autopsy report of the "Oswald" slain in Dallas — there are glaring differences in height and body scars, noted the officer.

For nearly 30 years, controversy has swirled over who shot the President and why. Oliver Stone's smash film "JFK" has spurred tremendous new interest in those questions.

Now the Russian agent says he has the answers. The devious plot was hatched by Premier Nikita Khrushchev — who was enraged when JFK forced him to back down during the 1962 Cuban Missile Crisis, said the agent.

"But to avoid U.S. reprisals, Khrushchev ordered the KGB to place the blame for JFK's death on an American. And when Oswald briefly defected to Russia, he was picked to be the patsy.

"A highly trained KGB marksman, who closely resembled Oswald and spoke English perfectly, was chosen as the assassin.

"This man spent several months observing Oswald through two-way mirrors in a defectors' welcoming center, copying all his gestures."

The phony Oswald then was spirited out of Russia to the U.S., where he got help from a cell of "at least nine people" in arranging the assassination, the officer said.

"Russians and Americans were involved in the planning. One of them was Jack Ruby — who killed the phony Oswald to shut him up after he was caught by Dallas police.

"Some of these men are still alive and living in Moscow. They are surprised the Warren Commission never stumbled onto the plot — because there are documents in the U.S. which prove the slain Oswald was a phony!

"The real Oswald's 1959 Marine Corps medical report showed him to be 5 feet 11. The 'Oswald' killed by Ruby was two inches shorter, according to the autopsy report.

"The same Marine report shows the real Oswald had three scars on his left arm. The imposter had only two.

"What's more, Oswald had a small scar behind one ear from an operation when he was 6. The agent did not."

The KGB file is kept in a strong-box at a secret KGB office in Central America where much of the plan

was laid, confided the ex-KGB officer, who now works for another Russian government agency.

"The phony Oswald is named in the file. So are the American collaborators. And there are other details, such as the planned escape route. I can't disclose them at this time because they are state secrets and I'm still sworn to secrecy.

"But in the near future those papers will be released — and finally the whole truth will be there for the world to see."

ENQUIRING MINDS WANT TO KNOW ...

What happened last week

LAST WEEK nearly 200,000 Americans decided it was time to switch jobs. That's more than 1,000 people changing careers every hour!

LAST WEEK the U.S. government passed out more than \$1 million to farmers who raise goats. That's enough money to make 3,000 winter coats out of dollar bills! The subsidy, started because of a shortage of mohair during World War 2, has continued to this day. But in an effort to cut costs, Congress has limited the annual mohair payments to \$125,000 per farmer by the year 1994!

LAST WEEK Americans gobbled up a scale-busting 323 million pounds of tomatoes. That's equal to one monster tomato 227 feet wide and as tall as a 14-story building!
