Chicago IL. 60617

Dear MR. Harold Weisberg

Four years ago I contacted Mr. Athan Theoharis from Marquette University. I wanted his opinion on this material of the assassination but could not help me because he was not an expert, so he gave me your name and address. After seeing a program you were on I decided that the information on the program aired 11-19-88 on television convinced me to send you my report that might be of interest to you.

I believe that in order to prove or disprove another review commission, I feel that this information is important because I can reproduce a mechanism using remote control. If you need any questions answered please contact me by mail or by phone.

YOURS TRULY
Sergio Molina

CHARACTER

My name is Sergio Molina, 8238 So. Shore Drive, Chicago, Illinois 60617, (312) 375-8792. Information about myself that led me into putting this information together. I am sure that you will be able to see my qualifications in pursuing this matter. I really do not know how to best inform you of all details of the assassination, itself, I only wanted to present the tactic and only the tactic. My theory information is only a parallel to what the Warren Commission had in their files, but I covered most of all the information that has not been covered by the Warren Commission and the U.S. Select Committee Panel of Assassinations.

I have four (4) years of completed military training (West Point Candidate).

Nine (9) years in technical studies in engineering working in time, space and planning building, and industrial design.

I worked in automotive patternmaking engineering blueprint reading in design for patternmaking of detailed parts.

I checked and doubled checked all theory and tactic information, I am confident you will not find any questionable doubts about its effectiveness.

The time I have put in my investigation has been restrained because I know what the outcome might do to not only the public, but to our Government Security. I must state that at the time after the assassination, I believe Earl Warren had to hold this country together this information would have had devastating results, so I feel Warren did do the right thing even though I do not approve of such actions.

The information I gathered took me a little over two years in research updating and backtracking of each important eyewitness account to what they heard, where they were at the assassination time. What disturbed me, I made sure I did not become over confident in my conclusions, because I realized I came up with a possible perfect crime theory. I have tried to be realistic about who might have invented the Electronic Assassin tactic, all I can take credit for is the putting together a workable assassination plot that might have come from a Central Intelligence source in similarity. The way the tactic works only a government agency would find it useful with the training of a small group to carry out an assassination without a flaw.

Two years ago, I accidentally stumbled on the idea. The information I have sent to you probably would take a few days to understand the tactic as being unique. I was hoping to improve this theory in video form. My expenses have not gone over two hundred dollars to pay for copies and materials.

I believe the conclusion has to be presented to the right person because of the sensitivity of the matter.

My conclusion in theory points to a group or persons connected to carrying out the assassination, all eyewitnesses become obsolete right from the start to finish. One must see the electronic assassin tactic as a circle that cannot be broken from the outside. The circle probably consisted of five (5) to ten (10) men with the knowledge in tactics in assassinations.

One more important observation the length of time of Oswalds' employment was one (1) month. One (1) month to layout preselected route (building & streets) slowdown points known to Secret Service including the knowledge of slowdown along the route next to depository because of turns. By leading Presidential motorcade to Oswald, Oswald also was a target for a setup as for Kennedy it was a high-tech ambush.

The only chance of stopping the assassination was the bubble top that would have canceled the attempt, if the shots of mechanism were discharged with the bubbletop on this would have indicated the limousine was surely booby-trapped, the bullets would have ricocheted all over like inside an armored tank, proving my theory correct.

TACTIC IN SEQUENCE

1. Oswald
2. Surveillance of Oswald
3. Tactic selection
4. Rifle selection
5. Recased bullet
6. Recased bullet delivery to F.B.I. or Secret Service
7. Rifle sale to Oswald MOB-F.B.I.
8. Possible F.B.I. Connection
9. Secret Service route selected
10. October 15, 1963 Oswald hired book department
November 1, 1963 advanced Secret Service Man ordered to Dallas
11. On November 18, the motorcade route with the Dallas Police Chief
12. Slowdown points along route
13. Government Property-Superintendent of Book Dept., Roy Truly, who strongly disapproved of Kennedy policies
14. Oswald hired October 15, 1963, two weeks, to Advanced Route Selection
15. Two weeks before assassination, Lee Harvey Oswald wrote a message to a F.B.I. man and ordered F.B.I. man to destroy message
16. Presidential trip begins
17. Limousine flown to Dallas, mechanism installed during flight
18. Motorcade starts, rifle shot off three (3) times need three (3) empty shell casings (rifle planted)
19. Pictures of Lee Harvey Oswald in front of building.
20. Oswald could have stayed in front of the building and never had to fire a single shot
21. Recased bullet prints and proven ownership of rifle to Lee Harvey Oswald
22. Electronic assassin tactic takes place
23. Limousine flown back to Washington (mechanism removed)
24. Oswald caught.

X

The symbols in the key helps describe bullet characteristics and purpose in the assassination, the key is meant to be read forwards or backwards in checking time, location of bullet in the investigation. At first I went over the Warren commissions report out of curiosity, like everyone else I kept thinking rifle, sniper location, and motive for the assassination. In attime span of many years off and on I would check all sources that might be of interest in the assassination to develop a theory as to where the shots came from.

On March 14 1983 I made a discovery unconsciously because I was not really thinking of anything in particular the discovery took time to sink into my mind at first I saw it as not important. That thought was on the Bazooka Training film showing the results of firing the weapon, it had principles that I applied to the way the tactic took place also the Warren commissions report helped in knowing the path of the bullets plus other theory reports reduce the possibilities or the odds in this case. At first I saw this Electronic theory as just that, but since it would also apply to our presidents or other leaders present and future I would have to say that the dangers would still exist to those who are not familiar with this tactic even the experts. The reason this Electronic assassin is dangerous it works soley to give an illusion which works flawlessly and to those who become familiar in exicuting the tactic it is quite easy to carry it out. The tactic can be contrlled 3 individuals to get any results they planned just by planting a rifle and tampering with limousine jump seat the harmless looking limo ^{OSIN} wouldntninnanyones eyes mind be subjected in taking part in the assassination. Geometry, Space plus timing was the ingredient in developing the EA tactic to applying it to a complex incident without witnessing the actual event. The EA tactic works the same as a math problem I tried to make this information as clear as possible to all who see this information especially to those who are not familiar with guns or bullet characteristics, the EA tactic in order to be a success needs these elements (below)

Oswald or any man with ties of any source of political beliefs other than that of conspirators, proven ownership of rifle is a must. Need pre-tested results as to the bullet with L.H.O. rifle bores recased date of pre-testing water test FEB 1963

Training time mechanism preset
Timing sequence
Mechanism installed in limousine during flight from Washington.

Time, Date and building location for assassination preplanned route of motorcade.

Planted rifle with L.H.O. PRINTS

Personal instructions to L.H.O. could have left depository minutes before motorcade

Remote control shot# 12 CONNALLY TARGET shot# 11 KENNEDY, Window of depository target

Umbrella man point man for angle

(continued)

Assassin in grassy noll shot#3

Results 3 shots to match 3 shot 3 spent shells of L.H.O. rifle even though no shots fired fired by L.H.O. rifle During motorcade. L.H.O. kept stating he was a patsy

Inside limousine jump seat would show 1 bullet hole facing Kennedy 1 bullet hole on Connallys side of seat indicating 1 bullet went through

3rd shot to head of president by expert rifleman, little or no cross swing involved because of the distance and speed of the limousine sniper position (grassy noll)

Mechanism removed from limousine back to Washington leaving bullet holes making all who look at the seat see only one bullet had gone through.

.

Experts would think think the miracle bullet with L.H.O.s rifle bores is the final cwide evidence as to the bullets traveled space over 70yards where in fact it only traveled 20 inches. The throwaway bullet because it had to break theroth the plastic backing of the seat would have a chance to lodge itself in the presidents neck depending on the powder strenght to have the bullet fly towards the socalled Oswald window, even if the throwaway bullet were to miss the president both technics would have been effective. The throwaway bullet had only one purpose and that was in creating the hole plus the angle showing the flight of the miracle bullet.

BY TRADITION ALWAYS WAS-THE PRESIDENT SAT ON THE RIGHT SIDE IN BACK OF THE LIMOUSINE SO THE PRESIDENT COULD NOT GIVE UP HIS SEAT UNLESS IT WAS MOVESITINGG KING OR SOMEONE ALONG THEM LINES. THAT BEING THE CASE THE TACTIC WOULD HAVE VERY LITTLE CHANCE OF FAILURE.

Innmaking the operation possible a group of men each with a job that would work like clockwork in reaching a point of efficiency from repeated training. Each mans job was very simple very little chance they would get caught, the most difficult job on the spot was the man in the grassy noll he needed the C.I.A. credential card wether it was real or not when he presented it to police officer in the parking lot we will never know. The combination of different jobs would automaticly made the tactic more complex and very difficult to solve and if it is solved it was only a matter of chance.

.

JOB DESCRIPTION	# MEN NEEDED
Motorcade route, date and timing	1
L.H.O. hired less than one month before assassination at a government building within the same time span as the motorcade route planning.	
Remote control device space, timing	1
Ubrrella man on a clear sunnyday, the location of the umbrellaman is of importance because the first shot went off as soon as the president crossed his path the 2nd & 3rd shot was all a matter of timing matching the time that the Warren commission had making both theories parrallel to each other with the same results. After the 1st shot this person folded up his umbrella and walked away when everyone else was running no doubt the umbrellaman would have been an excellent target for a madman with a rifle.	1

(continued)

Limousine man in charge of installation and removal of mechanism from Washington and back to Washington. Mechanism installation time a matter of minutes during flight.

1

.....
No less than five man needed to this tactic required

The reason for presenting this information on this tactic is that if it were ever to be used again or anything similar to this tactic the experts could use this tactic knowledge as an example or possible solution to all similar assassinations that might not be what they appear to be. As long as the world knows how that the electronic assassination ingredients do exist now by what I am presenting, the tactic cannot be used effectively with a copycat assassination because of todays police investigative technologies. This theory will show that the police were familiar with rifles but not electronics, In 62 that would have been a simple oversight by todays standards.

The public being caught with the electronics craze helped make the electronic assassin possible to work, in 62 it would have been very difficult to convince the public of their capabilities and when they did come out it was demonstrated in the James Bond in a fantasy movie but Kennedy being a James Bond fan their capabilities might have become very much a reality.

THERE IS ONLY ONE REASON FOR THE EXISTANCE AND USAGE OF THIS TACTIC(ILLUSION)
WHICH BRINGS MY CONCLUSION TO CONSPIRACY.

THE ELECTRONIC ASSASSIN
THE MIRACLE BAZOOKA

FAH M

The development of the electronic assassination was purely accidental because of anyone who has military training will remember that the bazooka training films demonstrated the killing force from both ends, the same principle miniature version was applied to the results of the bazooka missile to the backflash destruction force.

The rest of the investigation details fell into place with the help of the Warren commissions report.

Famous Film

Abraham Zapruder, a Kennedy admirer, hoisted himself atop a four-foot abutment, awaiting the

Oswald's revolver

Unfired cartridge found in clip case

Oswald's passport

Rifle shells found in Book Depository

Bullet that presumably hit Kennedy and Connally

THE ELECTRONIC ASSASSIN BROKEN DOWN

The Groups

Part They Played

The MOB

The MOB, I believe provided the rifle to be sold to Lee Harvey Oswald, the only problem not thought of was the timing in the bolt action, which I believe was a mistake on their part.

Connection

F.B.I.

Rifle somehow had to be test fired or water tested to provide the plant the miracle bullet to be recased.

Connection

C.I.A.

I believe had the route and tactic selected, also rigged and removed mechanism in limousine. (Again the rifle selected for Oswald was incorrect.)

Police Dept.

Had only two days notice, were not trained for this job, they were helpless in this situation.

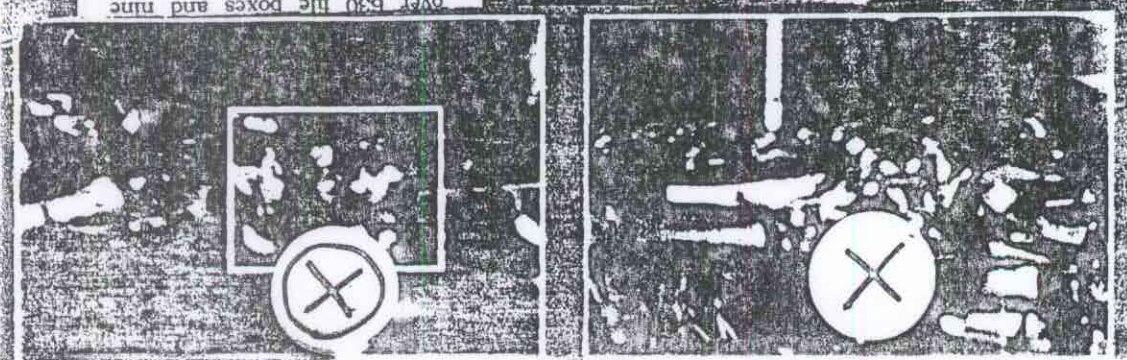

Secret Service

Did not have knowledge of what was going to happen, their job was to protect the President. The President was really dead days or hours as soon as he sat in the back seat there was no way for him to be protected.

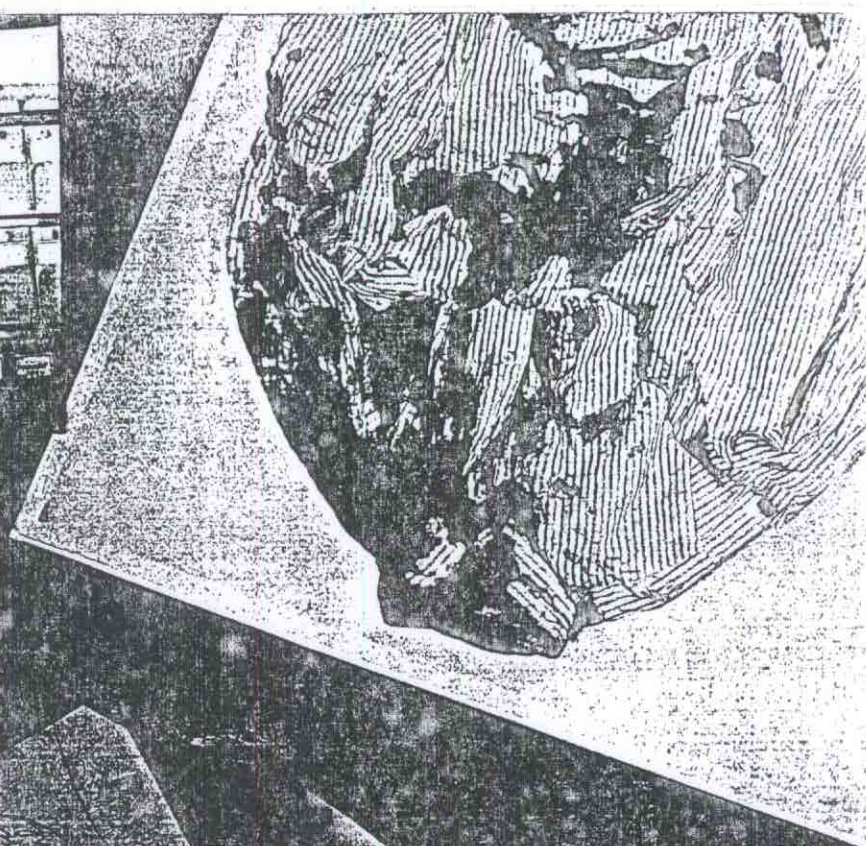

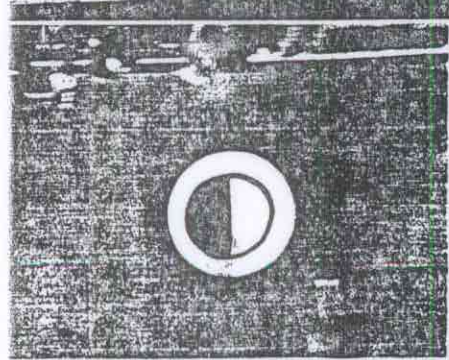

As soon as the mechanism was put in the jump seat and when the mechanism was removed, after the assassination, the circle of conspiracy was sealed. I feel it closed the door on Lee Harvey Oswalds' innocence.

IF LHO HAD SHOT
SHOT WOULD MISS GOV. CONNALLY

WHO ORDERED THE KILL

Jimmy Hoffa Said he ordered the kill on Kennedy, Hoffa was an excellent decoy Hoffa and Bobby Kennedy had something in common (Hoover).

J.E. Hoover Hoover probably figured Kennedy had so many enemies, the people only had a choice in wondering who did it. Earl Warren or the Warren Commission made a big mistake they never developed the electronic assassin possibility or even brought it up.

Conclusion

From all the information I gathered, Warren Commission, Police, F.B.I. the person most likely to call the shots to get hold of the miracle bullet all other information on Oswalds' movements in and out of the country through the F.B.I. Hoover organized. The connection again through C.I.A. which Hoover had to his disposal.

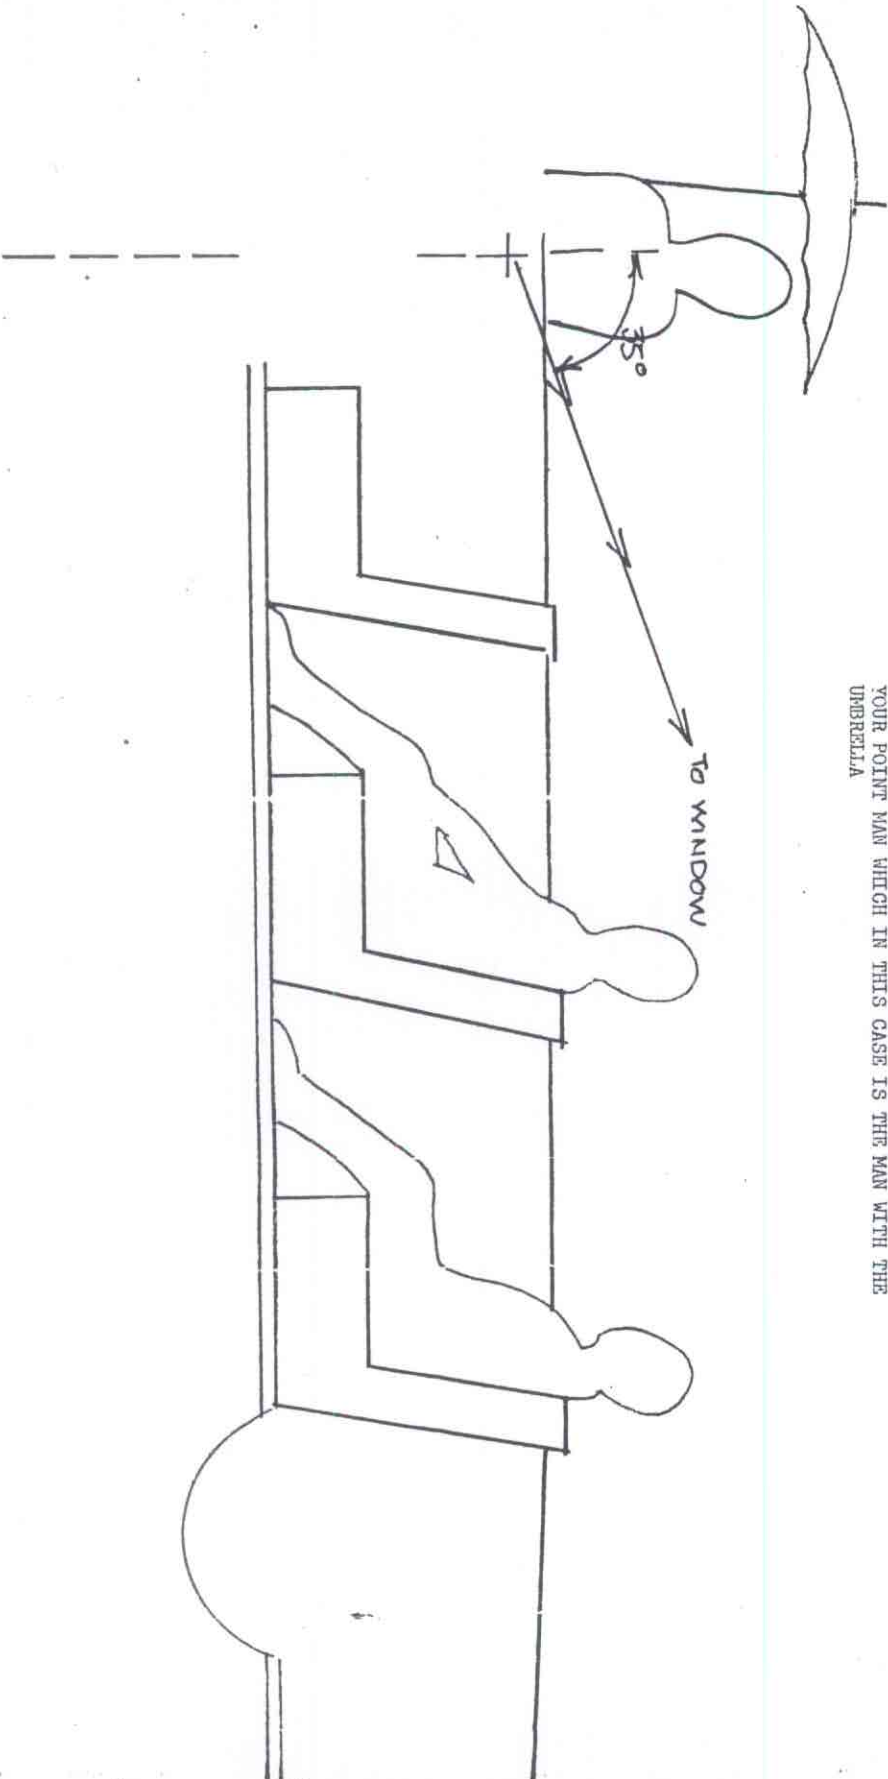

The electronic assassin tactic would leave Hoover and his group scott free of all suspects and suspicious happenings like ignoring witnesses would all be forgotten. From the information gathered in my investigation, I think would open eyes and raise questions as the murder of Dr. Luther King similar manipulations were done to control a group of law enforcement people. What I am saying is Hoover was in an excellent position to call the shots all he needed was his agencies, the miracle bullet and the electronic assassin tactic.

Quote

"When Dallas Chief of Police called Hoover the Chief said we have a suspect named Lee Oswald. Hoover, as far as I'm concerned there is no need to search in an empty well, Oswald is our man." With that statement Hoover convicted Oswald right on the spot.

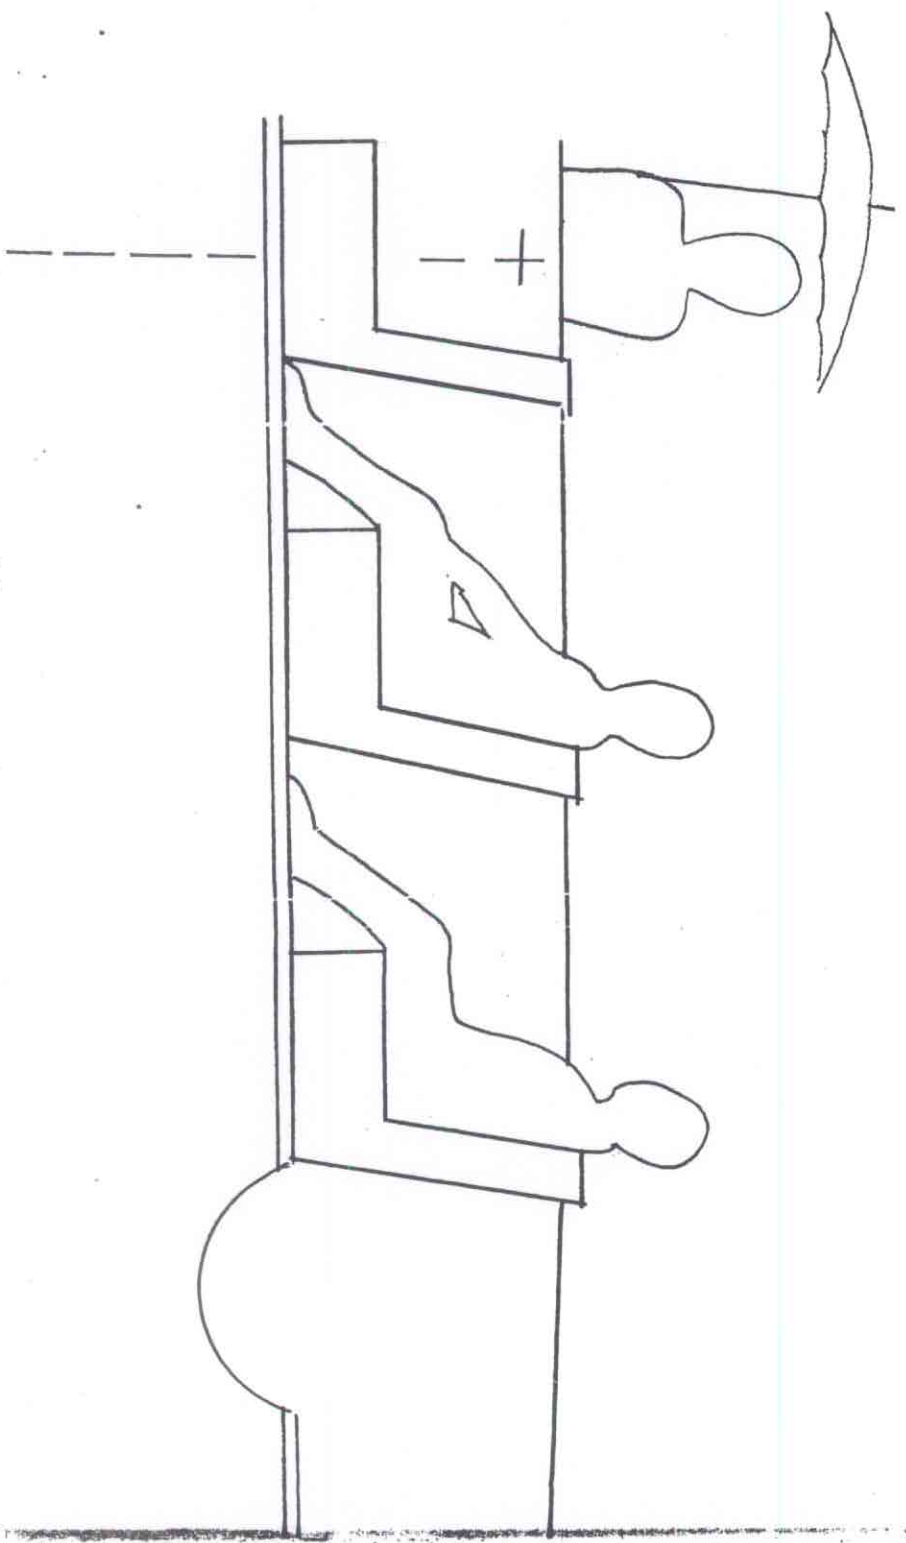

FRAME #1

THE PICTURES TELL WHAT TOOK PLACE DURING THE SHOTS FIRED. THE FRAMES COULD WORK AS ONE IS THE ASSASSIN FROM THE STREET OR BUILDING ANY POINT FROM WHICH THE UMBRELLA MAN CAN BE SEEN BUT FOR ACCURATE ANGLES ONE HAS TO STAND DIRECTLY ACROSS FROM YOUR POINT MAN WHICH IN THIS CASE IS THE MAN WITH THE UMBRELLA

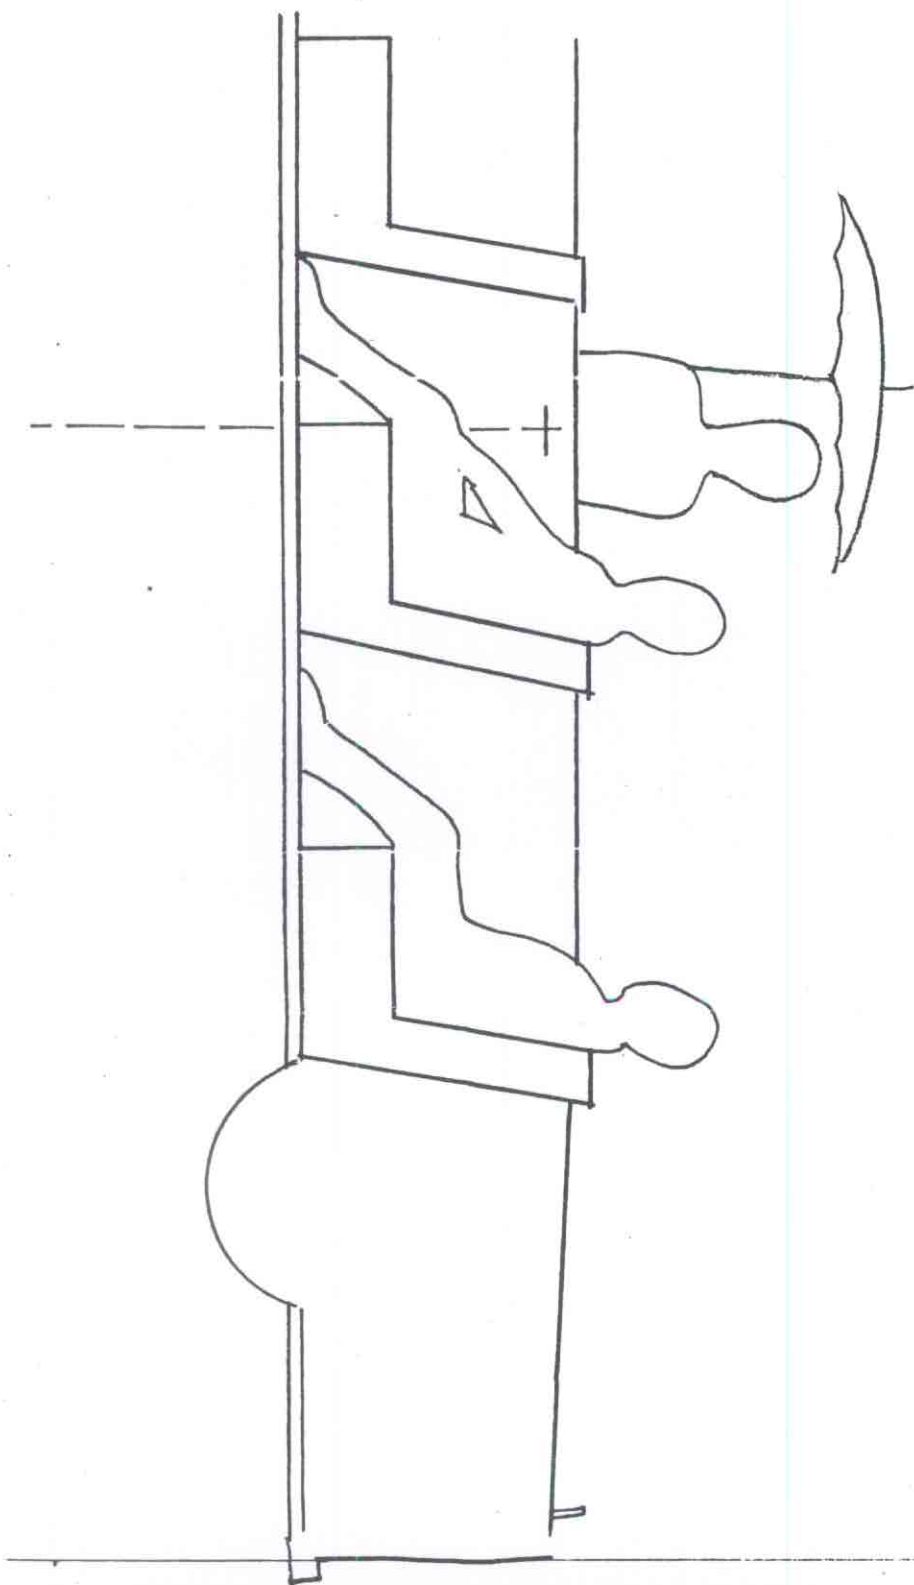

FRAME #2
