Dear Ms. Bulkin,

After receiving an EPA handler of hazardous waste mailing I wrote on 6/21/80 because there appeared to be no normal manner in which EPA could have included me as it did, with the combination of middle initial and wrong address.

You phoned and explained that a private contractor had prepared the list from business sections of phone book. I informed you that I have no business listing, never was listed as you had my name, and that the address could not have come from any phone book or other such source.

You also could not explain how I got on a list prepared as that one supposedly was prepared and were going to look into it and let me know.

I agreed to waive the time limitations of FOIA/PA when you said it might take more than 10 days.

It is now more than six weeks since I made my request. This seems like ample time. I would appreciate being informed when I may expect the requested information.

Sincerely,

Harold Weisberg
