

Notes

STATEMENTS OF WITNESSES, EUINS, AMOS LEE

This affidavit by a 15-year-old Negro youth, made to the Sheriff's department on November 22, 1963, says that he waved at the President and the President waved back and "I watched the car on down the street and about the time the car got near the black and white sign I heard a shot. I started looking around and then I looked up ... saw a man in the window with a gun, and I saw him shoot twice. ... This was a white man, did not have on a hat."

Euins' statements here should be compared with those he was quoted as having made to a police sergeant by one of the news media people and with other statements the Commission has by him and their own comments in the report because in the latter case the Commission says he didn't know whether the man was white or black and the report to the police sergeant said the man was a Negro.

However, his comment about the sign is exceedingly interesting and bears on what I have discovered, that there were not, as the current aerial photographs show, one large road sign, but there were three; two appear to have been removed since the time of the assassination. See my notes from the 26 volumes on the pictures, especially the analysis of the location from which the Zapruder films were taken and comparing the background with those of the Muchmore and Nix films.
