

Commonet on the times, ExSess 1/27 suit: I have been after this transcript for a long time but felt the time not propitious for going into court. When Lesar believed the time had come, I agreed. He spoke to this, to what is involved in the suit, to his friend Jim Donaldson, head of Howard U's math dept. Donaldson asked "im is he and I were "fixin' to get yourselves killed." Apparently not joking. Well, I didn't even stop to think that because I had always planned to go to court to get these papers and had always believed there would be no other way to get them, I had made a separate file of all the relevant documents. I spent Sunday night going over the master files to locate and copy the docs. Jim would need and from which he would select the exhibits to be attached. Because I forgot, it was wasted time and work. Even Howard, who knows some of my files better than I do and has indexed these, didn't remember the special, inclusive one I had set up.

HW 11/13/73
