Dear Sirs,

Please send me information on  
prices of your information on the "Political  
Assassinations" - We feel certain that a  
conspiracy has existed and does in fact  
still exist! What can the individual  
citizen do about the rotten mess in our  
government? We do not consider our-  
selves to be "Leftist Hysterical Radicals" as  
all dissenters are being labeled now -  
We are the hard-working taxpayers whose  
money is being used illegally and dis-  
honestly by the present government. Don't  
advise writing letters to Congressional repre-  
sentatives - statements by Senator Percy, Sen.  
Hugh Scott last evening on T.V. acknowledging  
the flood of letters in opposition to V.N. refugee  
influx & labeling the writers as "hysterical chronic  
dissenters" are an example of Congressional re-  
spect for the opinion of the taxpayer.

We want to order Whitewash II

Enclosed find check for \$6.<sup>25</sup>

"We" are a family of 10 adults who are all very much disenchanted with our "government Big Brother Big Daddy" Concept ("We'll spend your money and do with it what we feel is best for you!") We are all working & paying taxes. Mom & Dad both employed - 4 married daughters with heads of each family employed and yet we cannot make our opinions heard and acknowledged by the (not our) government. Our government - (a democrated one) would be influenced by the opinions of the constituents who elected them.

A totally frustrating situation!

Sincerely,

Mrs Lillian H. Finney R.N.

Dear Mrs. Finney,

You put the situation as it is and you express the national frustration.

The odds are long.

However, I know of no alternative to all the pressure possible on the Congress.

There are some new Members and some of them do have an interest, a sincere, responsible interest from the few contacts I have had.

So, no matter how we may feel the expression of our desires may be wasted, the time it takes is the only way of exerting any influence.

If enough people do let enough Members know, then it can be the deciding factor if and when a resolution is considered.

There is another and a very serious problem of which you should be aware.

There is almost nobody doing any real work today. All the public attention is to those who are skilled showmen and exploit the situation or to those who merely invent claimed evidence as they speak and draw attention to themselves.

You will see the consequences in the Rockefeller Commission's coming whitewash.

Yet these, who are knowing or unknowing but uncaring fakers and misrepresenters, also are the only ones who get any attention.

Thus the solid work, that which cannot be destroyed on Capitol Hill by the effective liaison people of the executive agencies, remains unknown while all the wild claims are batted down effectively.

If I do not try to gild the lily for you, I do suggest that hard as is the work of planting and cultivating, if we want a bloom we have no choice.

Sincerely,

Harold Weisberg
