

JL- Early a.m. news reports that in about 1968 the FBI had a ~~poor~~ poverty-program employee in New Orleans as a paid spy. This may be important because a lawyer who figures in the LHO investigation and was never a witness was in the legal-assistance part of that program and later, under Nixon, suffered in a way about which I do not have instant recall. I have a file on it/him. Any clipping may have value and I think we should seek the info. reported in this newscast. EW 2/7/75
