

FBI - Legal Repleto

JFK assassination records appeals

Harold Weisberg 10/10/79

The attached Not Recorded Serial from 62-109090 is exactly as provided to me. The original is in a kidnapping file, assuming that the Director has no separate files relating to his conferences with the Attorney General.

From appearance this paragraph was cut from another copy and stapled to a piece of paper.

I do not provide this because of the astounding reflection of the FBI's opinion of the Secret Service or because of the admission of the vastness of its domestic ~~int~~ intelligence operations, 500,000 people with 25,000 indexed in New York alone.

What is provided does not include any basis for the Director going into the question of alleged nuts, Communists and hate-singers with the Attorney General.

What is provided therefore does not include all relevant information.

This serves to remind you that it has been months since your admission of having located the Attorney General's files was placed in the record in another case and my calling this to your attention in the hope of belated compliance from those records in both King and JFK cases.
