

PH: Reur 62-109060 list

2/2/78

Some of these are of interest re my past work and litigation (as defectors, which figures in CA75-1448 withholdings.)

Those of which I'd appreciate copies follow. After that I'll have a few comments that may be of interest to you. I'll also be sending you a check. And the Enquirer people went off the with clippings list of which I wrote you. Not having it I can't identify it. The last one before today's mail.

248;25-1;473B; 488; 586;5867; 644;662;290;302.

With 258 you say "odd deletion." If it would not be burdensome if you'd send me copies of these kinds in the future perhaps from my experience in going over King records I might be able to suggest what is missing or why. If we do this I'd better set up a special file because I do expect to get the worksheets, which ascribe the deletions to specific exemptions. (and referrals to other agencies.) In time there may be some need or desire (including mostly by others) to contest some.

586, deBausset- he came to see me years ago, took such time and many pix and nothing ever appeared. Other such experiences.

787 has Jesse Core saying WDSU was sending film to NY. I do not think this could have meant physically. And if this is a deBruys report I think it was from phone conversation. I'm also sure it did not include all Jesse would have told him. If not deB also interesting because deB covered TM bldg. Core and Planner saw that film on the station's movieola as soon as they heard the LHO name. If this does not mean send in the sense of "feed" it is not consistent with all I know. The FBI borrowed that film.
