5/8/94

Dear Roger,

So they later will not be able to use it if that happens here is my exchange with Moore. There is no inaccuracy in what I wrote. It is infact understated. As a kid in high school he refered to himself as a research institution, as I now recall.

For your thinking, there is littel chance that Posner et al will not assume that you know all that is in Case Open so, if you see any usefulness in it at this point, you are giving nothing for the future away in using it now. My own instint would be to ridicule the hell out of their sanctimonious pretenses, including to scholarship, to the judge now. Aside from the non-~~serious~~ interviews he says were (interviews, some of his sources so important to him invited ridicule, like Hubie Badaeux./Bringuer. Brennan and his so late book. (Enough in Whitewash on him.) And what he wrote the ExPost about their review and what I noted about what he wrote it. (Not what isn't in Case Open.)

He uses a source who referred to the conservative Louisiana Congressman Boggs as a "Communist"? Or the Bringuer who asked the FBI for protection from the non-conspirators?

Please try to avoid phoning me at my abnormal bedtime. The conversation lasted too long last night, as was inevitable, and as soon as I hung up it rang again with my sister wanting to talk to Lil who ordinarily would have answered at that time but then was in the bathroom. That I was more than two hours late getting abed was only part of the sleep problem. My mind was too much on what we'd talked about for sleep. I do not get enough rest as it is and it is not good for me if it is not solid rest, or not with my mind too active. And that I cannot help if it is on my mind when I retire.

That RH contracts a book by HARRIS after what Posner said and it published about him makes pedophiles look good!

For discovery, if you get to that, ask them to produce the index to the 26 Posner wrote and boasted so much he had to make and those "lost" Garrison files he said he "found" so you can determine whether the first exists and the second came from AARC or from some of Wegmann's file. Neither of which was "lost".

Good luck!
