

2/14/70

Dear Bud,

Yesterday I learned I have to take another sugar-tolerance test, lasting a little more than 6 hours. I have scheduled it for this coming Wednesday, 2/25. It will be at the Group Health Building, 2120 Penna, NW. I will be spending all six hours in the lab there, at the back of the 4th floor, with periodic bleedings and urine samples taken.

This would be a fine time for me to go over the Ferris file, if it would not be difficult for you to get it to me there. I could then return it to your office before going home. I am due there at 8:30 a.m., so it would be after 2:30 that I would leave there.

I recognize this may present a problem for you, but it is not advisable for me to go to your home before going there since I will be having to get up early and will be semi-starved. If you cannot do this, I will have a book to read. However, there are certain advantages, one of which is that this material will be fresh in my mind and we could then discuss it to better advantage.

In disconnected connection with Ferris, I discovered a strange thing yesterday. ODA05 is an Oswald file, the latter pages (there are only 24) dealing with him, allegedly, and the CAP. But they also deal with Ferris, as with the straightfaced FBI interviewing of him about other CAP members as though Ferris were just another person. But the last page deals with Ext. 276 at Tulane, without saying why, and shows it was possible to make long-distance phone calls from it because it was in an uncompleted building at Tulane, Monroe Hall. There need be no connection between this and Ferris, or, for that matter, with LHO, but how strange if it is not and is just tacked onto this short file for no good reason. Apparently but not certainly the period of interest was 6/63.

Re Davison: From the GAI-Air Force and State files you'd never know such a person ever existed, or was in Oswald's notebook. A few other things about these files may interest you. Remind me of Jean Denial when we discuss it, if you have any interest.

Sincerely,
