

Dear Dad,

6/23/76

While it is not the purpose of my writing you, I hope that by now you have a copy of your Gaudet interview. My colleague friend is to have gone to your office before now with a copy and to have offered to make you and copy and others for Jim and me and to have offered to pay for the, for which I'd promised repayment.

Jim is a different interest in Gaudet, if you come across anything else. In some areas he lied to you. My work on this dates to 1968 and 1969 but I recall it well.

Also not the subject is today's Schweiker press conference. I could not accept the invitation to it and Jim is unable to get there to tape it. If you have or can borrow a tape my major interest is in hearing who asks what questions. I'll return any tape or pay for a dub.

I continue to try to learn what I can about what Ray-ving there is.

You seem to be without concern about any hassling of you. I have no proof that this is what is up. Jimmy has said otherwise, but as I continue to learn I find nothing else indicated and this not foreclosed.

I presume it is an amending of the original plan but it is my information that new counsel (who totals three) are to file another civil suit, not against those Jimmy named in his most recent insanity. How many candidates do you have?

My guess is that in addition to the Nashville "conservative" there are Richard and his son, who graduated law school with Wayne.

I'm beginning to learn more of the complaints against you. They amount to nothing but these nuts can give them great significance.

Why Bob had to try to deceive sixth circuit I don't know. I assume that because he did not have to he may have a reason. This I have written Phillips, carbon enclosed. I know what sputtering fat sounds like and that it can burn.

I keep Jim posted. He does not believe whatever is supposed to be this "knock-out" of which I hear is aimed at you.

As I told Jim this morning, Shaheen is McKee's former law clerk. Shaheen plans to return to Memphis in a couple of years to practice law. I've communicated my ideas on "professional responsibility" to Jim.

Sincerely,
