\$134. TH

Dear Paul,

8/21/78

While I write for other purposes I do not want to forget that in temorrow's mail, 4t class because of the weight, there will be a package of the copies I've sade for you from DL 100-10461. There are fewer records of subject interest in this file but a fair number I have not copied for you because their value for me is in FOLA appeals, not from their subject content/ I will have a separate appeals file. which I think will not interest you, as well as the original records as provided, preserved as provided, plus a separate set of the worksheets, of which I'll be giving "im a set

The ESCA hearings held no syrprises for me days for the Bist b.s. This typifies the concern about which I take time now before returning to other work.

You will without doubt recall that I slow opposed these consittee nuts from the first and predicted what our nuts would do in april 1975. You should also recall that, skipping to the recent past, in early Mey I wrote and said we should organize to be abl: to offset the disinformation certain to be presented and aired. I believe I told you that I had already discussed this with bud, in dim's office and presence, and received no meaningful response , even reaction. I had dicussed it earlier that day with Jeff Goldberg and Job satz.

Both were here for a pleasant afternoon and evening not so long ago and I mentioned it to them again. Both impressed me on a personal level as good people, an impression had not had about any AIB people from their consistent record.

So we went into the hearings with nobody prepared to do enything, except that I did notice that Jeff Vohen has suddenly bloomed, with the non-profit org. All, into King/Ray assussination subject experts on coast-to-coast public TV.

I had, specifically, offered the advance opinion that if there was going to be an effort to of set the assessins' propagands it would be necessary to arrange in advance, I suggested how this could and should be done, and I offered to take the

initial steps myself. Nobody appears to have wanted this and I have other things to do. Lane did not do as well as I'd expected. I'd expected him to have no more subjectmatter knowledge than his usual O minus and I know his alibi witnesses were fakes, as is the one he has in reserve. But I had expected him to have better self-control because I am cortain he fears a Cay malpractise action at some point over the committee appearance. In terms of day's interest and in terms of Lane's self-interest and the image he projected he did poorly after a decent start in which he failed to perceive the clear signals that his ploy had failed. When he did not blow Stokes and Preyer he should have been zore quiet, more careful in his objections and more constructive in them. He blew the Rist thing incredibly. He could have turned it all 100% around

If I had had the Johan spot on PRS I could have ruined the committee and Eist over Siet, with no benefit to the FM. Aside from "in, who should not appear on this because of the tricky legal situation, there is notedy else who could have done this. I will solve some of the stuff available today but it will not have the impact of having been aired simultaneous with the assassins' fabrications. If it reaches as

I also tell you what I told Golberg - that I have no personal interest in any attention for attention's sake and do turn down appearances. A year ago "une when I was on Good Morning America I refused them thrice in two days but did go when JL urged it, for reasons that them appeared to be those that should control. Now and since then I've been sorry I did not stay in Dallas to continue the work for which I went there. Lust wook I declined to go to the ABC DC station, WILA, to provide communitary unless they provided transportation. When they did not, which is, by the way, usual, I did not co. It would have required either a private car or a cab and I could not bear the cost of the vab and had no private car available during the working day, from friends. (So their aired a law prof w. o appears to have been proposed to them by home from his comentary.)

"cluberg's explanation yesterday about why they went ahead with Cohen is childish.

It is that they had only one day's notice and that they had been recommended by a reporter who liked their stuff. (Which says something about the reporter.) By own view is that it is the same suff-secking, self-promoting AIB, with pale point over the same stripes. Sefere this committee is dead we have a good chance of seeing the commences of their utterly irresponsible career of wild conjectures and irresponsible charges, have did with Lano and as we shall see even more about how and Ray.

If the AIB people don't know that I alone have ione what I have done out the king case and if they are unable to resist the appeal of personal attention when they really are not qualified to provide expertise I think there can be no comperation with them or anything they are associated with.

Goldberg asked me if they could propes my name for the JFK hearings. As though there also will be no more King hearings. In the end I said that while I wight not want to do it at that time they could.

I will be thinking about this more and I will be discussing it with 'im and Howard, who has moved to Arlington, but my present disposition is to have nothing to do with any so-called cooperative effort because there never is cooperation with these kinds of people and with them in particular.

If anyone asks me independently I might do it. My present disposition to remain detached, as I have been, and not to get involved in any appearance with those with whom there might be a dispute. I have no desire to air dispites and less desire to remain silent where I may disagree.

I know of some arrangements, as those involving you. I have no objections to them. But I do think that making no mention of this to so is not easily explained. Whatever explains it and whatever it does not mean! shall take it at face value and remain aloof from it and from whatever arrangements there may be. Consistent with this I will want no use made on any of my work. I can't prevent use of what is published but I can ask that what is not published not be used. I'm not going to be in any such arrangements vicariously, second—hand or any other way. If there are, as I see no reason for there to bem, objections to this than I think the objects should be addressed to those who have gone so far out of their way to put me in the position in which I am, despite my early efforts to prevent this and create a better, more constructive situation for the hearings and any responses.

If whatever is done goes well, that is fine. If there is sere fucking up, I'll not be part of it.

For most of those involved the attitude reflect is sick, and for some sick with unrequited ego. For most it is a record of consistent failures, consistently counterproductive efforts and irrational subsultivation xerrisag of longing for reality with regard to the consistes and its career.

If there is functing up again at least I'll be clean, not part of it, and may be able to pick up some of the picces.

As by now you probably know from checking, I'm making some efforts to have some user made that may enable me to get a helper. To be able to look for one I have to be pay one.

As in the past I'm sorry about the situation. If I cared personally I'd be resentful at what it reflects, but I have no personal interest. By personal interest lies in finding time to write and anything that delays that is against personal interest.

In today's mail I have a Memphis clip. It is severely critical of PBS, Duke, Ackillan and others without even mentioning Cohen.

I've not paid close attention to the Dallac firing tests but from what I've heard on radio it appears to be no more than another putdown effort, an invalid test from which the committee will represent that the conclusions are valid. Like the pistol from an undisclosed point on the knoll, no doubt another nutty theory on which the assessine have fixed. Even Ruby's caliber rather than the /45 of the Garrison cover drot.

Hastily,
