

Dear Bud,

5/5/79

I'm sending these two attached FBIHQ records through Jim because Ldi and I are both tired, don't want to run the copier or stand, and I want Jim to read the CIA record because it is that dishonest and he may want to remember it for future use.

There is another record relating to you that is in a stack for appeals. I'll get around to it.

I've a few other Magell records, nothing of any special significance. I've placed copies in a subject file.

This one indicates he came to have doubts about Greenstine - to one who is apparently a writer who provided a copy to DJ/FBI.

Little by little we are getting the collar in order, as you will see if you stop off between DC and Deep Creek Lake. Ldi has decided to sell a very good and very old large copper apple-butter kettle and a couple of old chests, one use by my grandparents when they came to this country.

There may be a local interest but we have no idea of the value. I'd asked Jim to ask Paddy if she can give us a notice but he forgot, has been too busy or both.

Meanwhile, I have good help from a local college student, again as you can see, and am anxious to be able to continue paying her, which selling what we do not need can do.

These spells of sudden weariness are not new and they are unpredictable. When they hit I sit and read or type, with an ample stack to work from.

If you've seen Martin Price's whoring in Spotlight it really isn't what I said. A nasty business that fabricating of classic anti-Semitism in my name but nothing can be done about it now.

Suggest you remember in case he is in touch with you. He told me that Carlo is interested in the assassinations.

Old thing is that the only reaction thus far is favorable, from right-wing friends.

Best,
