

Dear Bud,

9/5/80

I don't know how Gary Shaw knew I had obtained info re DuBerrier under FOIA but I suppose it is possible. I may have given copies to others without keeping any in my own subject file. I made none on him in the FOIA records.

At some point someone has taken some of my regular file on him, from what remains in it. I have a blue carbon of my 6/28/70 to you, not suitable for copying on our machine which doesn't pick up blue. It may be that I loaned stuff to Garrison that was not returned. Your original should be clearer than this poor carbon.

I also have some blue thermofax copies that you can keep if you want them. I have no special interest in DuB. I probably have the original of the memo to me filed under my source, who I remember well. He is a writer who had lived in New Orleans and when there and in need had taken a writing job with Kent Courtney. He later took a job in Omaha, from where he wrote me and sent the clipping from the World-Herald.

The only other things that now remain in the file are the letter/<sup>given</sup>to me ~~from~~ by the reporter to whom DuB wrote and his enclosed newsletter.

While there is always the chance that one of these wrong-headed true believers may have heard something of interest, I have met few who don't switch it all around in their heads so that it comes out in accord with what they want to be rather than fact.

Because he got around much and met many, maybe he can say what might interest you.

He once lived in a house of many rooms. Mayhap he knows something about those of other view and other rooms.

Best wishes,
