

OFFICE OF THE ATTORNEY GENERAL

June 2, 1970

Mr. Harold Weisberg  
Coq d'Or Press  
Route 8  
Frederick, Maryland

Dear Mr. Weisberg:

This will refer to your letter of June 19, 1970 in which you request a photographic print of a composite picture showing the clothing of a clothing. As you know, Exhibit 60 consists of several photographs showing various styles of the President's clothing. Since there is no photographic print of this composite picture, there are photographic prints made from three of the four photographs from which the composite picture of Exhibit 60 was prepared. We have previously supplied you with the fourth negative showing the tabs of the clothing.

Your letter also refers to my letter of June 12, 1970 and to the request for copies of certain requests previously made by you. In referring to the testimony regarding the metallic composition of certain bullet evidence involved in the assassination, you state that the testimony was simply that all specimens were of lead, no more. This statement is not true since the testimony as set forth in Volume I, page 117 of the Warren Commission Report states specifically that the various items "were found to be similar in metallic composition."

11/9/63

With respect to the material concerning David William Ferrie you argue that "all the records of the Warren Commission are not in the National Archives." This Department has no information that any of the Ferrie material which the FBI furnished to the Warren Commission was not turned over by that Commission to the National Archives. It is noted that the last sentence of the Foreword to the published report of the Commission reads: "The Commission is committing all of its reports and working papers to the National Archives, where they can be permanently preserved under the rules and regulations of the National Archives and applicable Federal law." So far as is known by this Department, this was done by the Commission before it was dissolved.

You were advised that Commission Exhibit 843 consists of the head of the President Kennedy's head at the time of the assassination. This is the only fragment remaining of the head which was turned over to the FBI. This fragment is shown in the receipt furnished to you by Special Agents Francis X. O'Neil and James W. [redacted].

You have also argued that the FBI has never had possession of the head of the President Kennedy. The FBI has never had possession of the head, prints, or copies of photographs taken at the time of the autopsy.

*Richard A. Glavin*

Special Agent in Charge
