

2/5/77 - a few comments by FIA - tom No.

689, 690 are on F rd-Delach contacts. There are others having to do with a party meeting. On still another Decker referred to Fred as a "lead." I'd love that one. The papers would not use and pretended not to recall citation.

719, the "Louisiana situation" - can it be the Secret Service printing investigation? You may recall the FBI got the SS out of that fast. However, after LBJ gave the FBI the job there are records referring to SS as having jurisdiction.

745 - there is so little reference to the JFK assassination remaining I suspect the FBI excised some of that material, too.

757 - That Eldon Hadd was an SA in HRCy Legat, now Congressman. It was a Navy plane, he had pix and tape of intercept, was met at jows Filed a little after midnight by Haddam (Saitam?) JFO "red" subject expert.

766 - supposedly ownership of DHO's military records makes no reference to any security clearances.

62-109160-1489
769 - background on Ferris et al, says that Ferris was case defense investigating for when Marcello best deportation rep and was at the court with SA Regis Kennedy.

839 - I presume you knew Marie Kelly-Marrow connection/CIA.

908 - of the records relating to me, perhaps these, the FBI know before release that it had fabricated and released despite invocation of Privacy Act and JL's letter to AD-Hecker Act I was entitled to have correction disclosed with any corrected records. But they were not about to admit that the so-called annual celebration of the Russian Revolution (two months early yet) was a fabrication and they could not resist the temptation to defame. It was a Jewish Welfare Board picnic after the high holidays, for which area service personnel and families. I suggest this represents the real Gostape/HEB, aka FBI.

918 - my copy not complete. Any lunch who the source is? Space does not fit name of Dallas "Ince-Donald" editor who took up with FBI about them. Note that this was not leaked until after Shanklin's retirement was secure and that Hasty was not in any way disciplined for the destruction. Even allowed to talk to HSCA and Earl Galt.

942 - me on the Alan Burke Show, FBI's refusal to participate: Noble has always been in Lane's pocket. When the FBI would not provide opposition Noble turned to Lane and his publisher, who provided four lawyers, in apparent anticipation of ruining me and helping the Lane cooking market. It worked the other way. I ruined them and it made quite a show.

950 - the finding of the bagged pistol in downtown Dallas: I got this in Galt 78-0322. No follow-up investigation, at least not in files I got.
