Dear Meggie,

This is to setisfy any requirements or desires of your publisher.

Your unique, immormative, fescinating and exciting presentation is valuable and much-needed addition to the literature on the Warren report and the Kennedy assessination.

The Griffin-Rankin memo of March 12, 1964 is from the staff papers of the Commission. This copy was Xeroxed for me by the Archives and handed to me by Mr. Marion M. Johnson. There is a record of my payment for it in the General Services Administration. You are free to use it in any way you went. The Thermofaxed copy if to provide you a copy for your files.

If there is enything in my published work that you would like to use, you are free to use it, without credit if your publisher so desires.

With regard to the "een interview, I would suggest that if at all possible, we got Turner to type his notes as fest as possible and send them to me. I will not publish any of it, but I'd like to compare what he had to say with a considerable amount of unpublished material I have and I think it is possible there say be an additional use for it and possibly him, if his information is at all good.

I am anxious for the tape. I have had to get inches tape recorder. It takes up to 7" reals and plays at 17/8, 3/3/4, and 7%, so it is not necessary for Bill to go to extra trouble. I am, her you see Bill, also enxious for the Liebeler tape. Then he is in the hospital I hope someone can send me copies of his public statements, which are not printed here but make radio and TV. He is, as I have said before, more important in all of this than here been recognized.

Sincerely,
