

Bud-11/23/69 Finck N.O. testimony.

Herewith a few pages. I had to stop copying them because there would have been too many. Note that here he refers to Exhibit 400 as his pre-assassination worksheet. ~~He also says~~ he made close examination of the anterior next surgery and saw no sign of missile wound. He saw head X-rays, fragment X-rays (are they in panel listing?). Note also that he says the radiologist looked at the body (whole) X-rays (disowning fast) and there was no whole bullet... Page 94, "I can't recall exactly when I saw them"-we should have a handwriting test, for he wrote on them. In any event, he testified that he personally made some of the measurements on them.

96: He admits making notes and giving them to the others "at the time of the autopsy" (elsewhere he says before he left the room. He says both Rumes and Boswell made notes during the autopsy, which is what Rumes swore to, yet the government refuses to produce Rumes' note of this period to me.

These are but brief notes explaining some of the reasons for my copying these particular pages. I have much lengthier notes I have yet to read and correct.
