

1/14/72

Dear Larry,

Further refs to you 1/11: Wecht has no use for Garrison, with good personal reason. I had arranged for him to be their chief technical expert on the medical evidence, he went there and conferred with them, and they let him hang, switching to my second choice, a nut named Nichols, an arrogant, egocentric man who antagonized everyone at the trial.

On the Hoffa-Sheridan-Partin Moore matter, I have had some interest and done some (wasted) work. I have no doubt Hoffa did bad things. I have no doubt that what Bobby did was worse. Sheridan was then his ramrod. He was in N.O. at the time give and for the purpose of getting Garrison, he aired obvious libel, he did try and bribe witnesses, and when it was all over, it was then arranged for a WDSU staffer who helped, Rick Townley, to take the rap if it were not possible to keep this from trial. With all of NBC's help plus that of DJ, it was arranged in federal court.

During the course of this I got a six-hour long detailed and in some ways emotional interview with one of the finks Sheridan was using. I taped it, openly, and gave Garrison's office the tape. It hasn't been seen since and once I discovered that I never gave them another tape, although I permitted the dubbing of a very few or made some dubs for them. This guy is one of a pair Sheridan then fixed up with Partin in Baton Rouge, using the device of an arranged arrest of the second (Dave Ferris's protege and godson, a real rar on everything, including hard stuff, and a thug), after they had gotten employment as "investigators" with the (also bad) State legislative committee on the other side. It was an awful stinking mess. I regret the "disappearance" of the tape because I was able to get independent confirmation of parts from the two other people involved in arranging the initial contact with Sheridan, one a former reporter who has his own ad agency today (a period of divorce and alcoholism intervening), the other a woman born of a Chicago newspaper family who was not available when last I was in N.O. (late 11/71).

Partin did confess the entire thing, and what is in the papers is, in essence at least, I think true. I have a copy of not an affidavit but a deposition Partin agreed to and then didn't sign also, I think as a means of leaning on the government. The government was keeping Bobby's deal under Nixon, but a federal judge wouldn't stand for it. You can't tell the kind of Chicago's worst type Partin really is from your morgue, and Bobby, working really through Epstein (where Bud has the info I don't), did give him the promise of total immunity in return for the Hoffa testimony I think was really framed. I do have a Partin file but have forgotten its contents.

To give you an idea of how Sheridan operated with NBC, he went into criminal court in N.O. knowing the use of recording devices, cameras, etc, was banned, wired for sound, got caught and because of the NBC left got away with it. The (anti-Garrison) sheriff would not tangle with NBC, esp. because he knew Uncle Sam was behind Sheridan. I suspect this was Sheridan's S.O.P. and that when he visited me at my old place he was so wired and had a sound-activated tape recorder connected to an FM receiver in the trunk of his car. He also arranged for Townley to take me to dinner at, of all places and by seeming happensatnce, exactly the place in which he was, for which purpose Townley arranged for us to be delayed and delayed and delayed until we could get there when Sheridan was. I suppose the propose was so that Sheridan could authenticate the fact that Townley was with me hence by indirection anything Townley attributed to me.

Gervais was also involved in the Chicago proceedings, something your clips do not reflect. He also was with Strato, who apparently could not be more misnamed! There also seem to have been some efforts to do something to Long because I took some stuff of that nature to him in late winter past. I can't connect the two and didn't try, but I have little doubt there was a frame of Long being worked on.

Hastily,

1/14/72

Dear Larry,

Your 1/11 with enclosures (many thanks) didn't get here until this a.m. I haven't time to look at the rest, but the story is great. No apologies and don't worry about what you may have omitted that Wecht said or what the desk cut. There is no serious error in it and little of that. Many of those considered critics could not have done it as well. I assume your desk had no concern about libel, but believe me, as long as you don't say he went to a diploma mill or left a sponge in a bladder, you can't libel him. More and more of this is accumulating, which is why I've dropped everything to make fast response, even though I don't expect to be able to get this into today's outgoing mail, which would require a special trip to the P.O. now.

If you will remember my first backgrounding on this, in advance of the fact, there is either something I didn't indicate or something you don't recall, and I can't spell it out. However, I can put it this way: others have applied for access than has been indicated in any story to date. (You didn't catch Wecht's point when he said four pathologists alone have applied whereas Graham said four in all, of whom only three are path. The fourth is NYC's Helpert. His application was made about 1968, on his behalf by a former Congressman, Ted Kupferman, now an appeals judge in NYC courts. Marshall, Graham at all are ignoring what they want to ignore, are including only present requests. I was the first and I repeated my requests often. I made my first request about 11/1 or 2/66 and was rejected. I then went to court, remember?) Now there are ways in which a crooked interpretation of the contract could lead to the granting of access to other than a pathologist or serious scholar. Like a fink flack aka reporter. I hope I have been able to forestall this, but if I have not, I think this will soon enough be in court. I have taken all the necessary preliminary steps, I think, insofar as a non-lawyer can have a qualified opinion. You should understand that archives regulations on what is withheld require that a record be kept of all denials and that when anything is declassified all who have been rejected must have equal access. They will, of course, interpret the contract as negating this, but it covers somethings that it just cannot so cover. If I go to court I may make a broadside attack on the legality of the entire contract because it covers non-Kennedy property, off the record. No telegraphing.

I have written the judge who sat on my suit for some of this stuff charging perjury and fraud to the Archivist, cc's to the Archivist and Marshall. No responses.

Now, an Lattimer interview. I've checked for you and your story did not appear in NYC, which will help you. I have had confirmation of some suspicion. He is rabidly anti-red and considers this all a deep red plot in which ~~action~~ an army of trained guerrilla fighters, of whom Oswald was one, were turned loose to kill everybody off. Really, that wild. At least superficially he is a supersuperpatriot. I think that aside from what we have discussed and what you know for yourself, it would be good to lead him into this, perhaps by a general discussion of what, from all his in-depth investigation (the details of which you should come back to later, for here was none), he thinks lies behind so dastardly a deed. If he doesn't take that bait, perhaps ask the opinion did the Warren Commission understate the political implications, Oswald red, etc. And if he still doesn't take the bait, remind him that he has all along said his great and consuming interest in the Lincoln assassination led to his interest in JFK and he has from the first spoken often of the parallels. There can be NO parallel unless that of JFK was a conspiracy. Who besides Oswald? Only his bosses, natch. Get the point? Lead this guy out on such things in as much detail as you can and if possible have a second tape recorder going so you won't have to dub, for it is important that I go over all of this as carefully and as soon as possible. His thing is beginning to assume the proportions of a "Guns of November", if you remember that novel. After you and he have had this real nice chat and you've gotten all the seemingly innocuous that should be a self-disclosure of a politically sick man with animus and somewhat of an ego, you should ask him how he and the Warren Commission can both be right on the same bullet trajectory if he begins two inches or more higher

than the Commission, for must it not thereafter have an identical trajectory for the Commission not to be grossly wrong on all Connally's wounds? And must they not have been caused by one and the same bullet, JFK's and Connally's? (By the way, stay entirely away from the head, unless he volunteers. There are many reasons, but this other stuff is now more important, for one valuable part of the record will be his failure to ever say anything about the cause of death, among other things). When he places this entry wound higher, he necessarily places it in the neck, yet it may not have struck bone, for if it did it destroys the Report in many ways, one because they swore it didn't, another because that defaces bullet s and this one was perfect, etc. So, from his account, the bullet must have gone through the neck itself, still have come out the left side of the front through the shirt collar and the left-hand side of the tie, and in a not unfriendly way, please, ask him to explain to you how this is possible. Merely make a record. Ask him then about how a bullet going thataway could have gone into Connally's right armpit, again just making a record, not arguing. Please appear to be his pal anxious to help him make a good record, on the basis that what has appeared has been inadequate and in some ways not really comprehensible. Don't forget that Connally at some point held his hat in the hand that got hit (see if he knows which side of the hand was hit first. It was the dorsal, inadical lingo, not the volar, the top, not the bottom. Kinda casually ask him where the hand was when it was hit and if he has identified the frame of the Xapruder film at which Connally was struck. Oh by the way, you might say if you want to throw him off a bit at some point, how long did you study this film, when and what if any others. You might pretend ignorance and ask him if there are any others.

If he wants to go into the fragments shed by 399, the only thing he has ever written about, again let him say everything he can or will. It is his thing and he is woefully lost in it. He either deliberately ignores known fragmentation or is unaware of it. Here the most important thing to get on record is his statement that he has accounted for all the known fragmentation to you. You will want to understand just how important his work in this area is, he should understand, for you have never seen anything that makes sense to you, so you are asking the oracle. On this, he said on the Long John Show that it is impossible to get back a perfect bullet like 399, which is but flattened slightly, by firing it into cotton. Don't tell him, but I have more perfect ones gotten for me by a rank amateur. He may have learned about that by now and change it. But if he hasn't, get a good record on that, and after you do, especially after he says this was flattened a bit, ask him how it can be flattened without marking it in other ways, for you have seen published pictures that show not a scratch but perfect land-and-groove marks, and you don't know enough about this kind of thing to understand it. Remember, he presents himself as a firearms expert, the man who has fired thousands of bullets in his monumental research. He has shaved them, squeezed them, etc. If you do not feel it will be too aggressive, drawing upon your ignorance, ask him how this bullet could have smashed Connally's rib and then his wrist and then left a piece in his thigh without getting scratched by all that bone....It would be good to know how much of the testimony he has studied (apparently none), how much of the published medical evidence, how much he had seen of the unpublished medical evidence in the archives prior to seeing this new stuff, and what other evidence he has studied, from which you can ask his medical opinion, can the medical evidence be evaluated and conclusions drawn without regard to all the other evidence? Toward the end, you should ask how the pictures and X-rays ~~prove~~, in his words to Graham, "Eliminate ~~completely~~ any doubt completely" about the Warren Commission's conclusions that Lee Harvey Oswald fired all the shots that struck the President". Before getting to this, get him to repeat what he has already said, and perhaps with the neck would be the good point, that 399 could have missed the President and struck Connally only. Once he says that, unequivocally, he has been of great help. I am flooding Teddy's man with stuff he finds unwelcome, and I'll keep flooding him until his position will be intolerable. My slightest interest now is in publicity. I want fact and the time to put it together and use it correctly....I'll be sending a copy of this so he can have the same suggestions to an old and dear friend, Art Kevin, News Director KTL Radio, Hollywood, 213/462-2133, who is also going to try to interview L as soon as he has studio space. Art will not be able to do it until after you should be able to from what he has told me. You might, if you have time, fill Art in. Many thanks, gotta get to other pressing things. HW

Jan. 11, 1972.

Dear Harold,

No luck with Dr. L tonight. I'll try to call him ~~tomorrow~~ tomorrow, although I have to go to local FBI office tomorrow for questioning and prints on that bombing threat against the banks here. I handled and opened the letter and they need comparison prints.

Enclosed is the copy of the Wecht interview. I hope it is adequate, As usual they cut out some background stuff I thought important on the bullets, Gov. Con. etc.

As soon as I have time I'll go back through the notes on Dr. Wecht's interview. There may have been something I missed.

I'm sending some clips on Donald Page Moore along to you and Bob Smith. They may or may not have interest. Moore runs under a liberal image here. But note clipping labeled A.

I think Bob might be interested in these more than you. I've made a couple radio calls but no luck so far on Dr. L. tapes. Haven't contacted at WBBM yet.

Did you ever hear from your friend and the radio and TV matter? I may just call them up and bluff.

Thanks for the copies on the Dominicans in Chicago I haven't had time to follow up further. Enclosed a buck for the copying. Okay?

I also sent Dr. Wecht a copy of the Garrison book reviews from the Times. If you correspond with him at all you might question on his previous dealings with them. I asked him to call me when he gets word on his request.

I'll send more on Dr. L when available.

regards,

  
F.
