

9/29/70

Dear John,

Your long silence after we got the word from Israel caused us deep concern until we did not see your name among those of the hostages of the new Hitlerism.

For your records, enclosed are copies of my latest letter to Fair and one to Meredith about those old matters. Flammonde seems likely to plagiarize my King/Ray work, which reminded me that they had done nothing. Likewise, neither Gollen nor Pavzner. I'll try and work something out with them or I'll try and go ahead with a suit. I think all aspects are as close to airtight as they can be on such matters.

I'm a bit under the weather, some minor respiratory problem.

Except for a summary list of questions, a la WATFORD, and annotation of the appendix, when it is finally decided upon, my work on retitled COUP II (FRAMEUP: The King/Ray Case) is now done. If a major publisher had it, this book would make a pot. They are behind schedule, typically, but are rushing to get manufacturing done. Or, so they say. This is not so that it will be released immediately, but so that it can be in the event developments make it seem like a good idea. Otherwise, it will not appear until next year.

In your absence, I got a summary judgement against Justice on the material for which I was suing and also filed several new suits. When I've got time, I'll revise several more already drafted and file them. I think the potential of these suits is good, despite the silence that accompanies them.

The latest development is that I asked the judge to do something about perjury committed by a DJ lawyer. I do not expect him to, but I am making this record. He did commit perjury and I so state and prove in an addition to the book covering the suit and what it yielded.

Best to all,
