impatient to locate Martin. One reason is he says that General Walker's house is in that film. This begin another conspiracy, that before the ssassintion somehow Martin went to Dallas and then to New Orleans to photograph the Oswald arrest there. Joe says he is a former reporter. He does not know that Gus Russo is work ing on the show, as Russo told others, for \$200 a day. Russo also says he has a book contracted, with a coauthor. Apparently this is etill another PBS deserration for which they can use only the ignorant or the exploiters and commercializers. I told Joe bluntly that it is disgraceful. For PBS to waste money in this kind of junk that at best only misleads the audience & and that it cheapens PBS to commercial TV. Tris out of date. That there is no connection, if what he said is true, between Nova and Frontline, both produced by the same station, and I can't believe that they do not talk to each other, does not mean that the Frontline producers or any others on its staff have not heard of the triticisms of the Nova show of several anniversaries ago. It seems to me to mean they have the same arrogance of mind or prejudices or untrustworthy sources.
