

Dear Don Gibbons,

8/26/96

We appreciate letters like yours of the 21st and thank you for it.

The list of our books is enclosed.

When you send your order please note on it or with it that you'd like the books signed. Glad to do that but between now and then would not remember it!

I'm glad you are reading Case Open with Case ^Ulosed at hand. I'm ^{Sorry} sorry that about 75 or 80% of what I wrote was eliminated. No reason given.

In connection with your belief on the shooting, I went into that at some length in the first of the Whitewash series and more in Post Mortem.

Only some of that is repeated in NEVER AGAIN!

There is in Post Mortem what still has not appeared elsewhere on the shooting and the wounding.

Thanks also for your good wishes. I'm 83 now and twice this year was hospitalized for congestive heart failure.

But I'm still working, writing for the record for our history.

Thanks and best wishes,

Harold Weisberg

Mr. Weisberg,

8-21-96

I am writing you this letter for two reasons. One, I would like to order two (2) of your books - Whitewash and Post Mortem.

Second, I have just finished reading "Never Again" and was very impressed with your facts on the assassination. To me the compelling fact of a conspiracy to murder JFK was the bullet that missed. There were just too many bullets fired for just Oswald. I believe that at least five (5) shots were fired and probably more. I believe JFK was hit three (3) times - the back, the throat (front) and the head (front right temple). Connolly at least once. The stray bullet that hit James Tague - total (5)!!

Also, the fact that Oswald's bullets were full-metal jacketed, which would not fragment on contact with the body as did the head shot. There are many many others but these are enough to have made me know that Oswald could not have been the lone assassin. However, I do believe he was in on it.

To close, I want to thank you for all your hard work you have spent researching and obtaining the closed files. From the day I saw Oswald

shot I started believing something did not make sense.

I hope your feeling ok! If at all possible I would love to have your signature on the books. I have read a total of around (40) books on the subject and have enjoyed reading yours the most because it is fact instead of all these "crazy" theories that tarnish the conspiracy buffs. I started reading your "Case Open" tonight with the book "Case Closed" beside it for comparison purposes.

Anyway, take care and May God Bless.

A Fellow Believer,
DON GIBBONS
