Dear Mr. Giampoli,

Answering your letter of the 25 after reading its enclosures trouble me because I cannot honestly reply as you obviously would like. So I've fixed on two sentences in your letter: "...since our line of investigation is synonymous" and "no organization has seen fit to help in this ~~exercise~~ research, investigation and writing endeavor." The first is not true in any real sense. Our "lines" and not in any way "synonymous." I deal with fact only and you deal with what is mostly fiction despite your description of it as "responsible sources." A few have some knowledge of the first available JFK assassination but most have no contact with the established fact of the assassination and its investigations. Some are overfrauds, meaning both the books and their authors, some are theorizers who have no real basis for any theorizing or advance what they know is false and not a single one is dependable. Not one, for example, has come here to use the more than 250,000 once-secret pages I got by FOIA lawsuits and I do make them available to other writers without charge. Because you have nothing to add to this crap except what you imagine, why should any organization see fit to help you? Hell, they don't help real work!

What has happened is that someone commercializers a nutty theory and the rest of you go for it uncritically and often add to it and then the addition is added to and it gets wilder and wilder. And the tragedy is that most of you have no way of seeing this and see all sorts of things that are not there.

While from what you sent me that I return herewith as you seem to have asked I have no reason to believe that you have any interest in tainting the fantasies about which you write, I enclose a list of my books on the off chance that you may get interested in fact rather than theories. There is no theory in any of my work. And there are no leads to be followed because the crime itself was never really investigated and was never intended to be.

Unless there is another upsurge in assassination interest, when perhaps anything at all can again be printed, you are wasting your time. No responsible publisher will consider the kind of stuff you sent me, regardless of the high opinion you seem to have of it.

I'm sorry about your hardships. I lived through many years of them. But I'm now almost 80, with many health impairments, want to use as much ^{as I can} of what time remains me for my own work, so please do not ask me to engage in any further correspondence about this.

Sincerely,

Harold Weisberg

RE: JFK, MLK Assassinations & The OCTOPUS

Dear Mr. Weisberg:

This letter and enclosed information is directed to you in the hope, that since our line of investigation is synonymous, you might be able to provide further information and direct me to an appropriate receptive granting source. Please review the enclosed before continuing....

After viewing the documentary on Martin Luther King Jr.'s (MLK) assassination, "Who Killed MLK?", and perusing your book on the subject, thought it might be worth the time and effort to contact you. Also, just finished viewing a video presentation by authors Jim Marrs (Crossfire), David Lifton (Best Evidence) and Wm Turner (The Assassination of RFK). This and all other reliable sources validates my thesis (Octopus & JFK Assass. articles). That assertion is that the same cabal was responsible for the actions postulated in the Octopus piece.

If you believe that my contention is on target, it would be greatly appreciated if you could help me in some way, shape or form. For whatever reason, no organization has seen fit to help in this research, investigation and writing endeavor. Because of essentially being blacklisted by the local "powers that be" and harassed by the corrupt court system, I've been bankrupted and isolated due to individuals being afraid of associating with me.

Thanking you in advance for your time and consideration; hoping for a timely response.

Respectfully,

Roy J. Giampaoli

Addendum: Due to the financial manipulations of the S & L's, BCCI and BNL (a.k.a. Iraggate), plus the constricting of the world economies, we find ourselves in an international depression that might parallel the Great Depression of the 1930's.
