

3- 3/22/93

I did not expect to be writing you further today but in today's mail is some thing- I think you may enjoy.

It is from a newsletter turned out by an architect, Cutler, who is as nice a guy as he is far out on the assassinations. And a few other things.

I generally flip through it to get a notion of what is new in fantasy land.

This assassination by umbrella is not new. What what can be done with that theory does interest me. So, when I saw the illustration I stopped and read the page.

One of the eminent researchers who supports this assassination-by-umbrella is one of what Livingstone refers to his "team" if I recall a letter I believe has been sent to C & G correctly. If it has not been and they want it I'll be glad to ^{send} it.

If I recall correctly the anti-Livingstone conspiracy has as one of its objectives interfering with his relationship with Sharrett.

This is not intended as a spoof. They are quite ^{so} serious.

This killer umbrellla is ^{truly} a remarkable assassination device.

As you will see, it requires no sighting to be deadly.
